VALDESIAN NURSERIES

BOSTIC, NORTH CAROLINA

Field View, Firs, Koster's Spruce and Norway Maples

Evergreens for Effect Now—Thousands to Select From—All Types
and Sizes—Hardy, Strong and Beautiful—Transplant
Now for Years of Enjoyment to Come

*Trees, Shrubs, Vines, Roses
Perennials, Bulbs and Plants*

BEAUTIFY YOUR HOME THIS SEASON
MAKE ITS SURROUNDINGS PLEASANT

VALDESIAN NURSERIES CORDIALLY INVITE YOU TO VISIT THEIR NURSERIES

BOSTIC is situated in Rutherford County, at the junction of the Seaboard and Carolina, Clinchfield & Ohio Railways. Trains reach here from Charlotte twice each day over the Seaboard, leaving Charlotte at about 9:30 in the morning and 3:25 in the afternoon, arriving at Bostic at noon and 6:45 P. M. We are two and one-half miles from Forest City, on the Southern Railway. We will be glad to meet customers, and friends, who wish to visit our nurseries, either in Bostic, or, if more convenient for them, in Forest City. We are within one mile of the State Highway from Wilmington to Asheville. This now has a splendid bus service passing one way each day. Parties wishing to visit us from Asheville can come over the most scenic route, by way of the State Highway, crossing the Blue Ridge Mountains, passing near the foot of Chimney Rock.

We began business in 1904 in a very humble way, on a few acres of mostly rented land. We now own eight acres of land in Bostic, running down to the depot, on which are located our packing and storage house, offices, buildings and greenhouse, with three plantations a few miles out, where most of our stock is grown.

We did not engage in this business planning to get what we could out of it for a year or two, and then stop. We have plants, thousands of them, growing in our nurseries that it takes years to develop. Some of these quoted herein we have been growing for ten years or more. Our one main object is to grow specimen evergreens, that one may beautify his home and get effect NOW, without waiting years for his place to grow into beauty from small seedlings or other plants.

Our land is especially suited to the growing of evergreens and other ornamentals. The soil and underlying clay holds a ball of earth, thus well preserving intact the vital fibrous roots, so essential to the successful transplanting of evergreens.

We have no agents, our stock being mainly sold through catalog, our business extending into most of the States. We are indeed grateful to our many customers and friends for so many favors which have they shown us. Through all these years a kind Providence seems to have guided us, and every year, as the seasons come and go, we find new customers, many of them perhaps in distant States, whom we have never before known, but after filling their order, we usually get orders from their neighbors. The demand for our stock is constantly growing, and no one could be more thankful than we are, and even a small order will be handled just as carefully as if for a car load.

Any banker or business house in your city, it matters not where you are, can tell you that we are reliable, and you will be safe in placing your order with us.

If you want ornamentals, or other stock; if you want to beautify your home, that will bring beauty and cheer the whole year through, or if you want to plant only a few rose bushes, small fruits for the garden, or an orchard, write us about it. If you don't know what you want, tell us; we can no doubt help you, and if we can't, we will tell you so. We are looking for satisfied customers, which means continued business, and not for simply what there would be in one order now.

If you wish to improve your surroundings, beautify your premises at the smallest possible cost, write us about it. We can send our man to look over the proposed improvement, make you an estimate on the stock, supply it and send men to plant it out, or you can take your measurements, map out a general plan, send it to our office and nursery, and we will go over it, make out a planting list and planting plan, and quote on same.

In sending our man to see the grounds, to lay out and make plans, we only charge railroad fare and expenses while away from the nursery, provided the stock is bought from us, but if this work is not done and planting stock is not supplied by us, besides railroad fare and expenses, we charge a reasonable price for our Gardener's services which can be agreed upon beforehand, if desired.

MILL AND VILLAGE IMPROVEMENT

There are few cotton mills and other mill villages that are not beautifying and improving their premises. In most villages and cotton mill towns, and even around the walls of the mill, there is ample room for splendid improvement. Instead of the dull, dingy walls and naked grounds, at little cost they may be turned into places of beauty, to the pleasure, moral and mental uplift of all concerned.

The writer of this booklet has often thought, if he were a mill superintendent or other official having power to make such expenditures, he would strive to beautify and improve these surroundings.

A place where workmen are better contented and the employer has a pride in his surroundings, certainly has much to do with the services of the employer.

There is hardly a set of officials in these towns and villages who, if the matter was called to their attention by the proper improvement official, would not give the "go-ahead" instructions to make such improvements, when, if properly done, will live as a monument to their services long after their work as official leaders is over.

DISCOUNTS TO MINISTERS AND CHURCHES

We have made it a custom for a number of years to allow a discount to ministers for their home or parsonage planting, as we also do for church planting. Quite a number have, during the past season, ordered for these plantings, and they have been highly pleased.

We have had various orders from parties seeing these plantings, who wished to beautify their own homes. Besides the benefit we get in this way from parties seeing our plantings and ordering themselves, we feel that it is good for us to give to these causes, so far as we are able, and we will be pleased to hear from ministers and churches, regardless of denominations, who wish to beautify their grounds—and the time has come when they are desirous of having pretty all-year surroundings.

We also allow a reduction in the prices of stock for use in the improvement and beautifying of cemetery grounds. We have thousands of plants especially suited for such plantings, and we will be glad to hear from any one wishing to make these improvements. We believe it is our duty, and one that we owe to those gone before us, to improve these grounds, that with a small expenditure we can change these silent "Cities of the Dead" from bare, lonesome places into all-year beauty.

Landscape Architecture

Hardy Trees, Shrubs
and Vines

A Landscape Plan for Your Home—

Change your grounds from an ordinary yard to a place of beauty, the cost is small and you will have something of enduring value, artistic and satisfying to show for the money you spend on your grounds. Many people come to us who have spent considerable time and money with no pleasing results. Here is the trouble with most of us: We plant a tree and a rose now, then two or three shrubs and a few more later, and have no definite scheme. We wind up just about where we started. The beauty of planting depends greatly on the preparing, grouping and arrangements.

When Landscape Gardening is mentioned many people think of vast estates and the expenditure of large sums of money, but this is a mistaken idea, for the small and medium sized places lend themselves to artistic treatment fully as well as larger ones.

Planting Plans—Parties desiring the services of a Landscape Gardener will do well to correspond with us before contracting this work, as we can have one of our men call, if within a distance of 200 or 300 miles of our nurseries, and look over the work, make out planting plans, supply the nursery stock, and if a satisfactory man cannot be had to do the planting, we can send a man from our nurseries to oversee the planting.

*Hardy Ornamental Shrubs from May to
December in this Garden*

HARDY EVERGREENS

Coniferous evergreens are particularly valuable in all classes of ornamental plantings. Every efficient Landscape Gardener knows that no grounds are complete without plantings of coniferous as well as deciduous shrubs.

During the summer months, when every tree or shrub is full of foliage, deciduous stock looks alright, but it appears lonesome during six months of the year.

Your new house may be all that you can ask for, yet no matter how substantial or how costly, it is not complete until its surroundings are blended with a sprinkling of coniferous evergreens.

Winter landscapes without evergreens look lacking and incomplete. If the home is to be made beautiful it can not be done with shrubs alone. It is to be regretted that the owners of pretty homes and villages, in attempting to beautify them permanently, have in so many cases planted shrubs and trees alone. They are pretty during the summer time, but at the first appearance of frost, the foliage and flowers are gone, and there is but little beauty

until spring, when they again put on their summer foliage. But this is not the case with hardy evergreens. During the cold winter months, when all is so dreary and lonesome, lacking and wanting for beauty and cheer, there is nothing so desirable as the brilliant evergreen with its beautiful colors and forms. No other investment possible for one to make will bring as much pleasure, comfort and beauty as the proper planting of Arborvitaes, Biotos, Hemlocks, Junipers, Pines, Retinsporas, Thuyas, Spruces and other like sorts.

Some homes do not require all of these, it is owing to the size of the building, premises and situation. But in our opinion no home is complete and affords the owner the satisfaction and pleasure it should until it has had the proper plantings of coniferous evergreens. Of course, the variety and sort should be suited to the size and height of the buildings and the surroundings. Some large and tall growing sorts not being suited to small homes and premises and the proper effect cannot be had unless the different sorts are arranged in artistic manner.

Juniper Glauca in Nursery Rows

Many public buildings, schools, towns, factories and other institutions could be wonderfully changed for the better, if instead of using Maples, Poplars, Elms, Oaks, Lindens and Willows, a few dollars were invested in evergreens.

It is true that many cotton mill owners of today are leading the community in which they

live by the beginning to beautify their surroundings with nursery stock, which are without taste and beauty, be the plantings ever so varied and extensive, without a mixture of evergreens. The broad-leaved sorts are good and there are places for them, but no planting is what it should be without coniferous sorts.

Cotton Mill Entrance Planted by Us

For eighteen years we have made the growing of evergreens our specialty. We have them growing in our nurseries, from the propagating beds to large specimens ten or more feet in height.

It is necessary in the proper growing of evergreens that they should be transplanted a number of times, in order that they form a mass of fibrous roots.

This is one reason that so many fail in the transplanting of them. Most concerns who grow only a few evergreens buy their stock of plants from an Evergreen Specialist, who supplies them from seed bed or propagating frame, where they have been rooted. They are then lined out in the rows in the nursery and there grown until they are dug for the customer. Hence they carry few roots and even if they are large specimen trees they have a poor root system, and while they may be dug and burlapped carefully, the earth becomes loose and when transplanted, even if it is done by an experienced gardener, they have not sufficient root system to take up enough nourishment from the soil to start them, and the result is you do not only suffer the loss and time in transplanting, but a year behind in secur-

ing successfully grown and transplanted ones.

Our shipping season begins in September and we can make prompt shipment, weather permitting, continuing in the spring until new growth is too far advanced for removal.

The prices in this booklet are for plants packed and F. O. B. here for either express or freight shipments, purchaser paying transportation charges unless otherwise noted.

To near-by points arrangements may sometimes be made that we make delivery by truck.

In carload shipments of evergreens they are dug with a ball of earth, which is burlapped around the roots and placed in the car that they remain in perfect condition, the dirt not being molested but planted as they grew in the nursery, insures their living, and the best results.

Parties in this and adjoining states, who wish to purchase in car lots can by arrangements with us, before shipment, secure at reasonable cost the services of our Landscape Gardener, who will direct the planting of the stock. This will be a man who has spent years in the growing of coniferous evergreens and who "Knows How."

SCREEN PLANTING

The planting of evergreens for screens or breaks can be made to do much more than beautify. For instance, possibly there is an unpretty view from some of your windows, an unkept vacant lot, the service yard, or a neighbor's place, or perhaps your own back yard, your own clothes line, is exposed to view, your house may be too close to your neighbor's, one can look into your windows, or vice versa. Light from the other's house or from the street may annoy you, you have not the feeling of seclusion you would most enjoy, and the plant-

ing of deciduous trees and shrubs could not be satisfactory. You have likely been on your vacation during the summer months when you would have enjoyed the foliage and beauty of these deciduous shrubs, but now during the winter months, when you spend more time in your own home, the leaves are off, and a more serviceable and beautiful type of screen to plant would be our Hardy Coniferous Evergreens. We have many sorts suitable for screen planting, and where it is desirable can ship in car lots of large sizes that will bring beauty and seclusion NOW.

ARBORVITAE

American Arborvitae (T. Occidentalis)—The most popular of the Arborvitae family, more widely planted for lawns, groups or hedges, makes a beautifully shaped tree, succeeding in all soil. It is especially valuable on account of its atmospheric odor. It forms an upright conical tree of medium size. It is valuable for screens or hedges, and can be trimmed like privet. Where mixed conifers are used for grouping it is always used to advantage. We can supply all sizes in this variety, running as large as 10 feet.

	Each	Per 10
12 to 18-inch, B. & B.....	\$.75	\$ 6.00
18 to 24-inch, B. & B.....	1.25	10.00
2 to 3 feet, B. & B.....	2.00	20.00
3 to 4 feet, B. & B.....	3.00	25.00
4 to 5 feet, B. & B.....	4.00	35.00

Compacta Arborvitae (T. Compacta)—Handsome cone shaped compact grower. Has fine foliage with limbs or branches extending from center as pages in a book. These are appropriate in various plantings, and a very desirable sort.

	Each	Per 10
12 to 18-inch, B. & B.....	\$2.00	\$20.00
18 to 24-inch, B. & B.....	3.00	30.00

Globosa (T. Globosa)—A dense thick evergreen of dwarf habit, grows naturally round like a ball and one of the best varieties, used in all plantings, and especially suited for tubs or box planting, corners or outer edges and groupings.

	Each	Per 10
12 to 18-inch, B. & B.....	\$2.00	\$18.00
18 to 24-inch, B. & B.....	3.00	30.00

Orientalis (T. Orientalis)—A pretty pyramidal or torch-shaped evergreen with erect branches and dense flat foliage of bright green color. A very popular sort. One gardener told us he did not want a better evergreen than the Orientalis.

	Each	Per 10
12 to 18-inch, B. & B.....	\$.90	\$ 8.00
18 to 24-inch, B. & B.....	1.25	10.00
2 to 3 feet, B. & B.....	2.00	20.00

Pyramidal (T. Occidentalis)—A most compact and erect sort. In erect form it almost equals the Pyramidal Juniper. Foliage deep green retaining its color throughout the year. Is called spiral shaped. Fine for tub, porch or special plantings. Used for piers, columns like Junipers.

	Each	Per 10
18 to 24-inch, B. & B.....	\$1.25	\$15.00
2 to 3 feet, B. & B.....	2.50	25.00
3 to 4 feet, B. & B.....	4.00	40.00
4 to 5 feet, B. & B.....	5.00	50.00
5 to 6 feet, B. & B.....	7.50	70.00

Tom Thumb—Smallest compact Arborvitae with feathery foliage, makes a beautiful ornament for box, porch or border planting.

	Each	Per 10
8 to 12-inch, B. & B.....	\$1.00	\$10.00
12 to 18-inch, B. & B.....	1.50	15.00
18 to 24-inch, B. & B.....	2.50	25.00

Thuja Occidentalis Globosa

BIOTOS

*Field of Biotos Specimen Plants*

Biota Aurea Nana—We believe this to be the best dwarfish evergreen in cultivation. It is a compact grower with yellow foliage, always shapely and one of the most popular evergreens we have. For lawns, either singly or in groups, borders or banking in front of porches. Where small growing sorts are wanted we know of no other variety so desirable as this splendid sort. It should not be overlooked in the smallest planting, as they are a most satisfactory variety.

	Each	Per 10
8 to 12-inch, B. & B.....	\$1.25	\$12.00
12 to 18-inch, B. & B.....	1.75	15.00
18 to 24-inch, B. & B.....	3.00	30.00
2 to 3 feet, B. & B.....	5.00	45.00

Sheared specimens in this variety are very desirable for tub and porch planting. We can furnish these at \$8.00, \$12.00, \$16.00, \$20.00 per pair.

Biota Blue Green—A handsome evergreen with beautiful bluish-green foliage that it retains throughout the winter. It is a dwarfish grower, making a pretty little tree and will add beauty to any collection. Fine for banking among other sorts.

	Each	Per 10
12 to 18-inch, B. & B.....	\$1.50	\$15.00
18 to 24-inch, B. & B.....	2.25	20.00
24 to 30-inch, B. & B.....	3.50	35.00

Biota Conspicua—This is a beautiful pyramidal evergreen of intense golden foliage. It is a variety we have never been able to get a large stock of, because most everybody seeing them desire some of them among their plantings. They are almost pyramidal and of dense foliage, and owing to their beautiful golden color they make a fine contrast among other varieties.

	Each	Per 10
12 to 18-inch, B. & B.....	\$1.50	\$15.00
18 to 24-inch, B. & B.....	2.50	25.00
2 to 3 feet, B. & B.....	3.50	35.00
3 to 4 feet, B. & B.....	5.00	50.00
4 to 5 feet, B. & B.....	6.50	16.00

Biota Pyramidalis—Compact and of narrow pyramidal growth. Its branches are short and densely clothed with bright green foliage. It retains its color throughout the winter better than many other sorts, and for this reason, together with its attractive pyramidal form, it is one of the most valuable evergreens. They are appropriately used for entrance, walks, corners, porch columns, piers, etc., and are also pretty and attractive in groups and various other plantings. Small ones are used among window box planting or tubs and porch boxes. We have a good lot of these that run 2 to 3 feet and 3 to 4 feet, many of which have been sheared, that are splendid specimen plants.

	Each	Per 10
12 to 18-inch, B. & B.....	\$1.25	\$12.50
18 to 24-inch, B. & B.....	2.00	20.00
2 to 3 feet, B. & B.....	3.00	30.00
3 to 4 feet, B. & B.....	4.00	40.00
4 to 5 feet, B. & B.....	6.00	50.00

Biota Rosedale—Foliage very fine, light green in summer, assuming a purplish hue in winter. This is a dwarfish variety growing very dense and distinctly different from all other evergreens. People who visit the nurseries to select plants about always include some Rosedale. Used for banking among evergreens and for various other plantings.

	Each	Per 10
10 to 12-inch, B. & B.....	\$1.25	\$10.00
12 to 18-inch, B. & B.....	1.50	15.00
18 to 24-inch, B. & B.....	3.00	30.00
2 to 3 feet, B. & B.....	5.00	45.00

CEDARS

Cedrus Deodora (Indian Cedar)—A majestic tree of pyramidal outline from the Himalaya Mountains. Foliage grows in tufts or fascicles and of a bluish-green color. The color is nearly as deep blue as Koster's blue which it retains throughout the year, but it is unlike the Spruces in that it grows throughout the season, whereas the Spruces only grow in early spring. It is a most desirable variety for lawns, corners and various other plantings, but it is not suited for banking. For lawn planting they add greatly to the surroundings whether single or in small groups.

	Each	Per 10
10 to 12-inch, B. & B.....	\$2.00	\$20.00
12 to 15-inch, B. & B.....	3.00	30.00
2 to 3 feet, B. & B.....	6.00	55.00
3 to 4 feet, B. & B.....	10.00	90.00

Virginiana Glauca (Blue Cedar)—A pyramidal variety, with silvery-blue foliage. Distinctive and very desirable. They naturally grow into dense and shapely plants without trimming. Its rich blue foliage and erect habit of growth lends beauty and attraction to the most expensive plantings. THEY ALL WANT IT.

	Each	Per 10
18 to 24-inch, B. & B.....	\$2.50	\$25.00
2 to 3 feet, B. & B.....	4.00	40.00
3 to 4 feet, B. & B.....	5.50	50.00

Cedar Red (Cedrus Virginiana) — An attractive and popular tree. Attaining a height sometimes of 20 to 25 feet. It is pyramidal shape and very hardy. Fine for back-grounds, drives, and roadways. Turns to purplish-bronze, in winter. We have a fine lot of these well known trees running from 2 feet to large and well developed trees 6 to 8 feet high.

	Each	Per 10
2 to 3 feet,	\$1.50	\$15.00
3 to 4 feet,	2.50	22.50
4 to 5 feet,	4.00	35.00
5 to 6 feet,	5.50	50.00

Cedrus Libani (Cedar of Lebanon) — This far-famed cedar of Lebanon is a tree which, on account of its beauty, has al-

ways been a favorite with poets and painters. It is a tree frequently referred to in the Scriptures; being perhaps the most beautiful of all cedars. The foliage is very dense and close-woven. In shape, the leaves are straight, tapering, cylindrical and pointed; they are about

an inch long, and of a dark green color, and grow in alternate tufts of about thirty in number. They flourish in most foreign countries, and in North America and South America. In Europe it is extensively cultivated for ornamental purposes, where it is said to attain greater age and retain its beauty for centuries. From the noted Mr. Ellis' writings, we quote:

"As I strolled among the flowers and blossoming fruit trees, I found myself under the famous old cedar of Lebanon, which is the pride of the campus for the American College for Girls in Constantinople. This particular tree, the president of the college told me a few days ago, is more than eleven hundred years old, according to the records. It had lived for centuries before the Crusaders so sadly sacked Constantinople. It was mature before the first Turk set foot upon the soil of Asia Minor. What a picture of history it would be if one could visualize the procession of persons who have stood under this tree looking across the Sweet Waters of Asia during the past thousand years, and still the giant that has survived the fierce storms that sweep down from the Black Sea is symmetrical and beautiful and as alive as ever."

Lamartine tells us that the Arabs regard these trees as endowed with the principles of continual existence, and with reasoning and prescient powers, which enable them to prepare for the changes of the seasons.

Besides being a most beautiful ornamental tree, it must produce very valuable wood, as it seems to have been used by King Solomon in the building of the temple. Peling tells us that its wood was everlasting, therefore images of Gods were made of it. The oil of this cedar was used by ancients for preserving their books. Chips from these trees are now used to protect furs and woolen goods from moths. It is said that Cedar manna, which is a sweet exordation, flows from its branches.

While Cedrus Deodora is a most popular tree, we believe that Cedrus Libani is destined to become the most popular variety among all the cedars, from the very fact that it is so often referred to in the Scriptures, that it is always symmetrical and retains its beautiful form, living to an age hardly, if ever known, of any other tree, never being attacked by insects or diseases.

In the United States, this tree, will, of course, not grow as large as in its native land but they thrive splendidly here, succeed on almost any sort of soil, but would not flourish on soggy or swampy land. They put on reasonable growth and while we can supply only small sizes at this time, they will in a few years grow into beautiful trees. Certainly every American home will want Cedar Libani. For permanent street or park planting, we know of no tree that will compare with this valued and world-wide cedar.

	Each	Per 10
12 to 18-inch	\$2.50	\$25.00
18 to 24-inch	3.25	30.00
2 to 3 feet	5.50	50.00

Juniperus Virginiana

ways been a favorite with poets and painters. It is a tree frequently referred to in the Scriptures; being perhaps the most beautiful of all cedars. The foliage is very dense and close-woven. In shape, the leaves are straight, tapering, cylindrical and pointed; they are about

CYPRESS

Cupressus Sempervirens (Italian Cypress) — A distinct variety, the foliage being almost a deep blue. Has tapering branches lying close to the stems. Grows very erect and shapely. Fine for landscape work in grouping, borders or single specimens. Its foliage and very erect growth makes it a most desirable variety for finest plantings. For years we have had calls for this variety—Italian Cypress, but have only recently been able to obtain sufficient plants to offer in quantity.

	Each	Per 10
12 to 18-inch, B. & B.....	\$1.50	\$12.00
18 to 24-inch, B. & B.....	2.00	17.50
2 to 3 feet, B. & B.....	3.50	30.00
3 to 4 feet, B. & B.....	4.50	40.00

Lawsonian Cypress—Pendulous branches like ostrich feathers. Foliage has a silvery-gray sheen. They make fine specimen trees if planted alone. It is a very graceful tree. Its elegant drooping branches and dark glossy green foliage tinged with its glaucous hue, makes it one of the finest. A rare and valuable sort.

	Each	Per 10
18 to 24-inch, B. & B.....	\$2.00	\$20.00
2 to 3 feet, B. & B.....	3.50	30.00

4 to 5 feet, B. & B.....	6.50	60.00

FIRS

Douglas Fir (P. Douglassii)—This succeeds better in the South, and in other sections south of Massachusetts than any other variety we know. Some years ago we bought several hundred dollars worth of stock plants of some of the firs, but had very few to live through the summer. The Douglas is a healthy grower, conical in form with spreading horizontal branches. Foliage light blue above with silvery-white below. It is a handsome evergreen tree, and is an odd looking variety, making it conspicuous and justly so that it is worthy of a place in the finest plantings.

	Each	Per 10

specimens	7.50	70.00

HEMLOCK—Tsuga

Carolina Hemlock—Compact graceful tree of rare beauty. Its hardiness, dense, drooping foliage and beautiful form makes it rank among, if not ahead, of the Japanese sorts. Its fine feathery foliage makes a splendid contrast among other evergreens for lawn or park planting, and one could not think of anything finer for border or screen. It is a coming evergreen for the finest plantings.

	Each	Per 10
10 to 12-inch, B. & B.....	\$1.50	\$15.00
12 to 18-inch, B. & B.....	2.50	25.00
18 to 24-inch, B. & B.....	4.00	40.00
2 to 3 feet, B. & B.....	5.00	50.00

Hemlock (Canadensis)—A medium size graceful evergreen tree of dense growth, branches thickly set with beautiful drooping feathery foliage of a darker color than the Hemlock Caroliniana and a very handsome tree. Fine for banking among other evergreens, group planting or specimen trees. It lends an attractive appearance in grouping owing to its drooping branches and feathery-like foliage. A sight of this tree as Nature's Architect scatters them in the Appalachian Mountains is something

wonderful to behold. It is always beautiful and even during summer time when deciduous trees and shrubs are covered with foliage, it appears pre-eminently among other sorts. No wonder Mrs. Wheeler from Redondo Beach, Cal., while traveling through the eastern Carolina mountains exclaimed, "This wonderful mountain scenery surpasses anything I have ever seen." Without this Hemlock these mountains would be lacking. They not only grow singly, but in groups and clusters appearing always beautiful and shapely. The noted Grove Park Inn at Asheville, being one of the finest resorts in the world, has prominently used among its plantings this beautiful evergreen. They may be used to advantage in quantity on large estates, as well as among other large plantings, while among smaller plantings they certainly should have a place. Bears trimming at any time of the year and is one of the best evergreens for hedging. After it has been cut back a number of times and becomes thick and dense, it makes graceful feathery-like foliage, which lends so much beauty to evergreen hedges.

	Each	Per 10
10 to 12-inch, B. & B.....	\$1.00	\$ 8.00
12 to 18-inch, B. & B.....	1.50	15.00

JUNIPERS

Juniper Pyramidal (Hibernica or Irish)—One of the most popular Junipers in cultivation, slender rigidly upright and formal evergreen in character, resembling a solid green column. The

English Juniper Glauca

underside of its foliage is of a silvery-gray while the tip is green color. Perfectly hardy retaining its beautiful color throughout the year. They are used in various plantings. Where groups are wanted and height is desired there is nothing prettier than a large clump of pyramidal Junipers. One of the most popular sorts for piers, columns, or corners.

	Each	Per 10
12 to 18-inch, B. & B.....	\$1.25	\$10.00

5 to 6 feet, B. & B.....	7.00	70.00
6 to 8 feet, B. & B.....	9.00	90.00

Juniper Glauca (New English)—A fine evergreen with distinct blue foliage, known by some as New English Glauca, is not so dense or columnar as the Irish. Where a little more spreading variety is desired, this is an ideal sort. They are always pretty, do not color up in the hardest of winter weather, and when planted singly, in groups or used in banking, they stand up making a prominent and attractive outline, lending beauty and attractiveness to the surroundings.

	Each	Per 10
12 to 18-inch, B. & B.....	\$1.25	\$10.00
18 to 24-inch, B. & B.....	2.00	20.00

6 to 7 feet, B. & B.....	9.00	90.00

Juniper Communis Depressa—One of the best prostrate forms of Juniper for ground covering. It will grow on sandy or gravelly hillsides, and where fully exposed to the sun. It varies somewhat in form from prostrate to ascending type occasionally two feet high. They have beautiful foliage very much like the Irish, but a little more intensely grayish-green. Some little nook or corner or other plantings in this variety lend quite an addition to other sorts. While they may be appropriately used for borders, banks or edgings.

	Each	Per 10
12 to 18-inch, B. & B.....	\$1.50	\$12.50
18 to 24-inch, B. & B.....	2.00	20.00
24 to 30-inch, B. & B.....	3.50	30.00

Juniper Excelsa Stricta—A very symmetrical conical outline with steel blue pointed leaves which stand erect. Foliage glaucous and arranged around the branches in threes. A fine compact variety for all purposes and especially where formal effect is desired. Fine decoration for box or tub planting.

	Each	Per 10
12 to 18-inch, B. & B.....	\$2.00	\$20.00
18 to 24-inch, B. & B.....	3.50	35.00
24 to 30-inch, B. & B.....	5.50	50.00

Juniper Sabina (Savin Juniper)—A spreading form with dark green foliage. It is valuable for rockeries, grouping and borders, making a fine effect with other sorts. It is a popular variety, which up to this time we have never been able to grow enough to supply the demand. At present we have a large lot of them coming on and can supply same in quantity.

	Each	Per 10
10 to 12-inch, B. & B.....	\$1.50	\$15.00
12 to 18-inch, B. & B.....	2.50	25.00
18 to 24-inch, B. & B.....	4.00	40.00

Juniper Excelsa Variegated—Exactly the same in color and form as the Juniper Stricta with the exception that it has beautiful golden tips, making it a rare sort. Our stock of this variety is limited but we are usually able to supply some of the sizes. At present we have 12 to 18 inch, and 2 to 3 feet sizes only.

	Each	Per 10
12 to 18-inch, B. & B.....	\$3.00	\$30.00
2 to 3 feet, B. & B.....	6.50	60.00

PINES

Japanese Red Pine—This is a strikingly beautiful little pine of refined habit, and used among the finest ornamental plantings. If you want a pretty little pine with fine form and distinct variety, this is the one.

	Each	Per 10
2 to 3 feet, B. & B.....	\$2.00	\$20.00
3 to 4 feet, B. & B.....	3.00	30.00
4 to 5 feet, B. & B.....	4.00	40.00

White Pine—This is the well known white pine that is grown in many sections of the country, has foliage of a delicate silvery-green and will grow in the poorest soil. We are unable to ship it in many places as the Federal Horticultural Board forbids the shipping of the White Pine into some of the states. If you want it write us and we will advise you.

	Each	Per 10
3 to 4 feet, B. & B.....	\$2.00	\$20.00
4 to 5 feet, B. & B.....	3.00	30.00

RETINSPORAS

Retinospa Plumosa Aurea—A compact tree of regular outline. Foliage plummy and graceful, tinged with a golden hue, which makes it a very striking and beautiful evergreen. A small group of this variety adds strikingly to the surroundings. They are used in various ways like other evergreens, making a beautiful contrast among groups and other plantings.

24 to 30-inch, B. & B.....	2.50	25.00

Cephalotaxus Pendiculata (Japanese or Korean Yew)—Medium size, grows bushy and compact, with dark glossy green leaves. A rare variety and makes a splendid contrast among other shrubs and trees.

	Each	Per 10
12 to 15-inch, B. & B.....	\$1.50	\$15.00
18 to 24-inch, B. & B.....	2.00	20.00
24 to 30-inch, B. & B.....	3.00	30.00

SPRUCES

*Field View, Firs, Koster's Spruce and Norway Maples*

Norway Spruce (*P. Excelsa*)—A most desirable evergreen for all purposes. For ornamental planting in groups around large estates or parks as a wind-break, for orchard, farm house or as a fence or hedge, it is a most desirable variety. It is absolutely hardy, a good grower, its branches being of a drooping habit. If planted in rows and not pruned it soon becomes an excellent screen, but it can be pruned to any height. If it is to be kept into a hedge it should be trimmed in June and October. It can be made dwarfish and very attractive by shearing off the ends of the branches each season. Bears transplanting well and will grow under all conditions, even in crevices of rocks and on hillsides where it would be impossible for other trees to get nourishment. Small trees are attractive and conspicuous, but it increases in beauty every year of its life, and is most conspicuous during the winter time. It can be planted as small bordering around large growing beds or at intervals along borders of flowering beds for winter ornament. When the snow covers the earth like a blanket, the foliage of a Norway Spruce brightens the surroundings and makes us forget the dreariness of old winter.

	Each	Per 10
18 to 24-inch, B. & B.....	\$1.50	\$15.00
2 to 3 feet, B. & B.....	2.50	25.00
3 to 4 feet, B. & B.....	4.00	40.00

White Spruce (*Picea Alba*)—A compact pyramidal form. Has greater symmetry than Norway Spruce, is not as vigorous grower, has elegant silvery-gray foliage and makes a beautiful little tree. Can be used for all purposes for which the Norway is used, and more, owing

to its being a compact dwarfish grower. They may be used for bordering small plantings and also among groupings and other evergreens for near the outer edges, for front of porch or house banking. They too, like Norway, will thrive in most all soils and perfectly hardy.

	Each	Per 10
12 to 18-inch, B. & B.....	\$1.50	\$15.00
18 to 24-inch, B. & B.....	2.50	25.00
24 to 30-inch, B. & B.....	3.50	35.00

Colorado Blue Spruce (*P. Pungens*)—A very shapely and popular Spruce. In color it is a bluish-green, and while even small plants are attractive, each year's growth brings greater beauty. A few well grown specimens make an almost priceless addition to a well-kept lawn. This tree is a native of Colorado. They are grown from seed and vary in color just a little, many of them being of a little deeper blue than others grown from the same seed. The intense blue can only be had in the grafted sorts known as "Koster's Blue," but the Colorado Blue is a desirable sort.

	Each	Per 10
12 to 18-inch, B. & B.....	\$2.50	\$20.00
18 to 24-inch, B. & B.....	3.50	30.00
2 to 3 feet, B. & B.....	5.50	50.00

Koster's Blue Spruce (*Picea Pungens* *Glaucostriata*)—The most popular blue evergreen among the spruces and so generally used for lawns and specimens. This variety is identical in growth with the Colorado Blue, but has the bluest strain of foliage, being grafted from the famous Koster's variety. They are healthy and make beautiful trees, being attractive at all seasons. They do not make large trees but owing to their intense bluish color, if a few of them are scattered about the lawn they will lend attraction to the surroundings.

	Each	Per 10
12 to 18-inch, B. & B.....	\$3.00	\$30.00
18 to 24-inch, B. & B.....	4.50	45.00

30 to 36-inch, B. & B.....	8.50	80.00

BROAD-LEAVED EVERGREENS

MAGNOLIA GRANDIFLORA

It has been said there is no tree which creates such admiration and beauty as the *Magnolia Grandiflora* and there is no doubt about its being king among all broad-leaved evergreen trees. To prize it is only necessary to see its beautiful radiant green leaves, and not any certain size, but anywhere from a small plant to a full grown tree, its fine foliage standing out in the coldest of weather, retaining its glistening, glossy-green color, and so wondrously fine, that they are sold by the thousands every year for decorative purposes. The tree begins to blossom in June, and continues through July and August, displaying hundreds of great, large flowers. These beautiful cream-like and bell-shaped flowers emit a very rich perfume that can be detected fully a block away. Several years ago, the Brooklyn, N. Y., Eagle wrote half a column in praise of this splendid tree. We quote from one sentence in part. "It seems strange that a tree so beautiful is not cultivated to a greater extent hereabouts."

The tree the Eagle referred to is growing in Brooklyn, N. Y., and was planted there some 30 years ago. It was secured on the Cape Fear river near Fayetteville, N. C., by a hunter who was spending the winter there. The paper stated that the sight of the tree was something wonderful, and even a limb with its loads of bloom, which had been presented to one of the merchants of the city and placed on exhibition in his store, was attracting the attention and admiration of thousands of customers who stopped to enjoy the sight.

It used to be thought they were not suited for cold sections of the country, but time has proven that such is not the case, as we have them now growing in New York, New Jersey, Rhode Island, Pennsylvania, Ohio, Indiana, Missouri and other like cold sections. A customer in Indiana, from whom we had an order wrote us a few weeks ago, "They are growing successfully in Cincinnati, Ohio, and we are no colder here than they are in Cincinnati."

In cold sections of the country, where the thermometer gets below 15 to 18 degrees below zero, they should be planted on the northern side of the buildings where they are protected from the southern sun during the winter time.

A number of these trees have been lately planted around the Washington home at Mt. Vernon. There is one street planted to them in Los Angeles, Cal., which is said to be one of the most beautiful sights in the city. For the beautifying of mill villages, towns, and parks, there is no tree that will afford the beauty and attraction and improvement as the *Magnolia Grandiflora*.

Of course for lawn or resident planting, only a few trees are needed, but in our opinion you will make a mistake unless you buy at least a few of these trees. Our trees are being well and carefully grown on upland fields where they are plowed and hoed like corn. Here they make a better root system, and if properly handled otherwise, insures their successful transplanting. Trees grown in bottom land have less fibrous roots, do not make as shapely trees and not as easily transplanted.

We can ship them safely anywhere, having delivered them successfully in far away California and the Isle of Pines. Where wanted we can quote on large specimen trees, some of which have been successfully removed from our nurseries to Providence, Rhode Island, and other distant sections. Special planting directions are given with each shipment. By all means plan to plant a few *Magnolia Grandiflora* this season and do it NOW. You will be pleased with them.

Abelia Grandiflora (A. Rupestris)—One of the most beautiful popular and satisfactory broad-leaved evergreens. The graceful drooping stems and branches are covered with dark glossy-green leaves, which in winter assume a metallic sheen. From the middle of May until frost this beautiful little evergreen produces beautiful little bell shaped cream colored fragrant flowers that almost cover the plant. It is hardy and a wonderfully fine thing, its foliage being attractive all the season. There is not a finer plant in cultivation than this *Abelia*. It is pretty anywhere and all the time. It seems almost to realize its own beauty, in that it is always trying to put on more loads of beautiful little fragrant flowers that always appear just at the right place so as to add more admiration and wonder to those who see it.

Its long blossoming period for nearly six months, which is given to no other like broad-leaved evergreen, makes it one of the most attractive and satisfactory sorts for groups, borders or banking among coniferous and other broad-leaved sorts.

Acuba Japonica Aurea-Maculata (Gold-Dust Tree)—A splendid ornamental tree or shrub with large handsomely variegated leaves. The bloom which comes in early spring is followed with clusters of pretty red berries, which it retains throughout the winter. The contrast with its pretty leaves and bright red berries make a very beautiful effect. They are hardy in the Southern states and about as far north as Washington. They are well adapted for city planting as they withstand dust and smoke to a considerable degree. They grow to a few feet in height and can be used to good advantage in winter as indoor plants. They are especially effective when planted in masses or groups with other shrubbery.

RHODODENDRON

The most popular plants for background planting, drives, paths and in masses along streams or lakes as the great masses of foliage retain their coloring throughout the year and provide a distinct touch of green in the winter landscape. They should be planted in shady locations where the land is not soggy and the soil as nearly similar to woods earth as possible should be provided. They are invaluable for decorating the shady nook about the house foundation or on the lawn. A heavy mulching of leaf mold in the winter will be beneficial.

Rhododendron Catawbiense—Flowers a bright crimson, borne in large clusters at the ends of the branches. Perfectly hardy in northern latitudes and one of the finest varieties. It is of a rather dwarfish growth, making bushy compact clumps and even small plants when around two feet flower freely. Its leaves which are of dark green are not as large as the Maximum and it makes a very pretty contrast among other broad-leaved evergreens.

	Each	Per 10

LIGUSTRUMS

The European sorts are especially valuable for ornamental planting. The *Lucidum*, *Napelensis*, *Japonicum* and *Chinensis* are evergreen in the South, and are valuable for ornamental purposes the whole year through. They are so adaptable to all sorts of exposure and conditions of soil that they should find a prominent place in most all plantings. Their bright shining fruit is borne in clusters, which stands up well on the ends of the branches above the lustrous dark green leaves, and remain on through the winter, after which its beautiful foliage enjoys a place of its own, being unlike any other ornamental broad-leaved shrub. They make a beautiful contrast among coniferous plantings, and it is said merit a freer use in English gardens than other like shrubs. They are easy to grow and will thrive in city yards, where most other plant life barely

exists, and are very ornamental, whether grown as single specimen or in groups or banked with other plantings. Many of the flowering shrubs are beautiful while in flower but the plants have little to commend them the balance of the year, being very unlike the evergreen *Ligustrums*, which besides their splendid healthy foliage produce flowers abundantly in the spring time, and together with their lustrous fruit gives them a prominent place in the finest plantings.

Ligustrum Amurense—This is hardy and an evergreen in the South, and while it is mainly used for hedges, it is now used by some gardeners among shrubby planting as a broad-leaved evergreen. It bears freely of very fragrant and white-cream colored flowers that are, if untrimmied, followed by clusters of little blue berries that hang on until late in the spring.

	Each	Per 10
12 to 18-in., B. & B., bushy..	\$.50	\$4.00
18 to 24-in., B. & B.....	.75	7.00

Ligustrum Lucidum—A very pretty little evergreen shrub which very much resembles the *Napelensis* except its leaves are a little larger, yet a lustrous green with somewhat spreading branches and cream colored fragrant flowers followed by black berries, which hang on through the winter. This is fine for banking among evergreens, grouping among shrubbery or side of walls, or as specimens.

	Each	Per 10
12 to 18-inch, B. & B.....	\$1.25	\$10.00
18 to 24-inch, B. & B.....	1.75	15.00
24 to 30-inch, B. & B.....	2.50	25.00

Ligustrum Napelensis—A splendid hardy broad-leaved evergreen, has fragrant and showy flowers. The leaves are larger than the *Abelia Grandiflora*, of a deeper glossy green and being in a class of itself bearing no resemblance to other hardy broad-leaved evergreens, and holding its splendid cheerful coloring throughout the year. It is one of the finest shrubs for landscape, banking among coniferous evergreens or shrubbery. It grows rapidly until it gets a couple of years old when it seems to delight in a greater production of its beautiful glossy-green leaves and fragrant flowers.

	Each	Per 10
12 to 18-inch, B. & B.....	\$1.25	\$12.00
18 to 24-inch, B. & B.....	2.00	20.00
24 to 30-inch, B. & B.....	2.50	25.00

Ligustrum Japonicum—This is a valuable evergreen shrub, but does not have the glossy-green leaves as the other varieties and is much used by landscape gardeners among shrubbery, lending a splendid contrast among other sorts.

	Each	Per 10
12 to 18-inch, B. & B.....	\$.75	\$ 7.00
18 to 24-inch, B. & B.....	1.00	10.00
24 to 30-inch, B. & B.....	1.50	14.00

Ligustrums are now much used in landscape work. All of them making attractive and showy plants.

American Holly (Ilex Opaca)—Native variety so familiar in Christmas decorations. Has spikes on the edges of its peculiar shaped evergreen leaves and makes a striking contrast among other shrubbery. Especially fine for specimen or open ground planting. It is hardy as far north as Pennsylvania. Bears a profusion of red berries that make it very ornamental and it is becoming more in demand each year.

	Each	Per 10
12 to 18-inch, B. & B.....	\$1.00	\$ 9.00
18 to 24-inch, B. & B.....	1.50	14.00
24 to 30-inch, B. & B.....	2.50	25.00

Ilex Crenata (Japanese Holly)—One of the most valuable broad-leaved evergreen shrubs. Closely branched shrub, with small dark green leaves. Can be trimmed in dense formal effect if desired, but will develop into interesting specimens if allowed to grow naturally. Ideal for working in among foundation plantings. Its thriving in partial shade near the seashore, and under city conditions, makes it perhaps one of the most useful of the broad-leaved evergreens.

	Each	Per 10
12 to 15-inch, B. & B.....	\$2.00	\$17.50
15 to 20-inch, B. & B.....	2.50	22.50
20 to 30-inch, B. & B.....	3.50	32.50

Mahomia Aquafolia—Holly-like leaves which remain throughout the winter, yellow flowers in May followed by great clusters of blue berries. Fine for mass planting or grouping among shrubbery or evergreens or under shade of trees.

	Each	Per 10

Japanese Holly (Mahomia Japonica)—This is a fine little evergreen tree which has large and fine foliage and makes a beautiful little tree. They are fine for various places where small

broad-leaved evergreens are wanted.

	Each	Per 10
12 to 18-inch, B. & B.....	\$1.50	\$15.00
18 to 24-inch, B. & B.....	2.50	25.00

Ilex Aquifolia (English Holly)—These we imported several years ago, thinking we were getting *Ilex Opaca* but owing to their peculiar foliage, which is of dark green, with frinkled edges and stronger spikes than our native holly, but began to bear berries while the plant was quite small, and not knowing just what it was, but being certain that it was not American holly, we sent sample of it to Dr. Coker of the University of Arboretum and he writes us that it is *Ilex Aquifolia*-English Holly, and states in part that "At Kew Gardens, London, it is one their most conspicuous ornaments and is often used to border walks, making formal columnar or spherical specimens." They are rather dwarfish in growth, perfectly hardy in the coldest of weather and with their producing so abundantly beautiful red berries, which seem to be larger than other holly berries, which they seem to produce annually, and owing to its pretty form and large berries believe it to be one of the most valuable varieties.

	Each	Per 10
18 to 24-inch, B. & B.....	\$1.50	\$14.00

HARDY DECIDUOUS ORNAMENTAL SHRUBS

Hardy shrubs require but little care when once established, and grow in size and beauty each year. They are effective for screens, borders and for grouping on the lawn. Nature is always bounteous in her gifts to man and has been unstinted in giving us a great wealth of shrubs with their perfumes and flowers, with their various colored foliage and bright fruit. No home, either large or small, should be without the enjoyment of these wonderful gifts. The uplifting influence they have upon thousands that are enraptured by their beauty and fragrance cannot be estimated.

We can supply large plants for effect and beauty NOW. Height will vary 18 inches to 3 feet, depends upon habit of growth of the plants.

AZALEAS

Azalea Vaseyi—A beautiful sort which bears delicate pink flowers with dots of begonia-pink at base of petals. Foliage dark crimson in the fall.

	Each	Per 10
12 to 18-inch, Select plants	\$1.50	\$15.00

Azalea Viscosa—Flowers white, slightly tinted rose, fine for swampy ground, but suitable for any soil. It bears fragrant flowers in profusion during June.

	Each	Per 10
Price	\$1.50	\$15.00

Azalea Nudiflorum—Fine and popular old variety. Perfectly hardy and free bloomer. Flowers appearing in early spring.

18 to 24-inch, bushy plants..	2.00	20.00

ALTHEAS

Althea (Rose of Sharon)—A beautiful small flowering shrub, and if left untrimmed will grow five to six feet tall. This is much used for hedges and screens. Fine for a dividing line between houses. Many cotton mill owners use these as a hedge, dividing lots and tenant houses on the mill premises. They bloom from May until September and are attractive. They are also used in massing among shrubbery. We have different varieties, and if you will state the color you desire, we will make a selection that will please you.

	Each	Per 10

CALYCANTHUS

Calycanthus Floridus (Sweet scented shrub)—A native shrub, foliage luxuriant and rare. Chocolate color blossoms terminate the branches, and are delightfully fragrant.

	Each	Per 10
1 to 2 feet	\$.25	\$2.00
2 to 3 feet50	4.00

CREPE MYRTLE

Crepe Myrtle, Pink (Lagerstroemia)—Vigorous shrub or tree. The leaves are a bright green with brown colored bark. Originated in Asia. Flowers appear in July, August and September, which are crinkled and ruffled, produced in panicles. Easily grown and will succeed on a wide range of soil. No other tree or shrub takes its place. They are among the most satisfactory flowering shrubs for Southern planting. It will not succeed in the cold North or Northwest, but is at home in the South.

Crepe Myrtle, Purple—A grand sort producing immense clusters of flowers of a deep rich purple.

	Each	Per 10
2 to 3 feet	\$.75	\$ 7.00
3 to 4 feet	1.00	10.00

Crepe Myrtle, White—Has pure white flowers bearing large clusters. A free bloomer and a showy shrub in any landscape.

	Each	Per 10
2 to 3 feet	\$1.25	\$12.00
3 to 4 feet	1.50	15.00

For screen or high shrubbery hedges the Crepe Myrtles are unsurpassed.

DEUTZIAS

Deutzia (Pride of Rochester)—A distinct and valuable variety. Blooms in June with fine double white flowers. It is much used by all gardeners.

Deutzia Crenata (f. p.)—Flowers double white delicately margined with pink. This is evidently one of the most popular and desirable flowering sorts.

	Each	Per 10
12 to 18-inch	\$.25	\$2.00
18 to 24-inch35	3.00
2 to 3 feet60	5.50

FORSYTHEA

Forsythea Viridissima (Golden Bell)—Produces golden yellow flowers profusely in early spring. An old variety of shrub which for some years seemed to have been almost forgotten, but lately is being used a great deal both in shrubbery gardens and landscape work.

Forsythea Weeping Suspensa—Handsome form, vigorous grower, and prolific bloomer. Flowers golden yellow which continue for some weeks. Conspicuous among other shrubbery. Has long curving branches used for covering arches and trellises. The stems and leaves retain their color until late in the fall.

Forsythea Intermedia—Erect in growth, somewhat slender, very profuse bloomer.

	Each	Per 10
12 to 18-inch	\$.25	\$2.00
18 to 24-inch35	3.00
2 to 3 feet50	4.50

HYDRANGEAS

Hydrangea Paniculata Grandiflora—

A beautiful hardy shrub, with bright shiny green leaves, bearing huge panicles of flowers 6 to 7 inches in diameter, and 8 to 10 inches long. Begins to flower in July, appearing white for three or four weeks, when it begins to change to a light pink, turning brown later in the fall. A fine thing for planting with other shrubbery, banking with coniferous evergreens, clumps or border planting, or alone. This is the thing about which you hear so many exclaim "Oh! what is that pretty flower yonder?" It is fine.

	Each	Per 10
12 to 18-inch	\$.30	\$2.50
18 to 24-inch40	3.50
24 to 30-inch50	5.00
2 to 3 feet, bushy specimen plants ..	1.00	8.00

Hydrangea Alba Grandiflora—Resembles the *Paniculata* variety, in form and shape of flower petals, but is not so large and round, being borne in panicles 5 to 8 inches in diameter. They bloom earlier than the *Paniculata*, beginning to blossom early in June and if kept worked and the blooms pinched off for a few weeks after they first appear, they grow and bloom continuously until frost.

	Each	Per 10
12 to 18-inch	\$.40	\$4.00
18 to 24-inch50	5.00

Hydrangea Hortensis—A very ornamental shrub adapted for southern outdoor planting. The white varieties bloom true to color, the others may be either pink or blue, depending upon the soil and cultural conditions.

Hydrangea Otaksa—A Japanese sort, producing great clusters of pink flowers. This variety is extensively used in decorations. Hardy as far north as Philadelphia, and grown in all parts of the country. The immense loads of bloom make them very conspicuous. Easily transplanted and need no particular nursing. For decorative planting on the piazza or porch they produce a fine effect. This is the kind the ladies have always been inquiring for. We now have a good stock of nice plants that cannot help but please. It is no wonder they have always been wanting them because they are very beautiful and there is no other sort that we know of that will exactly fill their place. They bloom continuously throughout the growing season. They are attractive alone or with other shrubbery.

	Each	Per 10
Well rooted plants that bloom first season.....	\$.50	\$4.00
Large strong plants	1.00	8.50

VIBURNUM—SNOWBALL

Viburnum Tomentosum Plicatum (Japanese Snowball)—It is hardy and produces great white balls of blooms, and with its handsome foliage it is more used in landscape work.

Virburnum Opulis or Red-Berried Snowball—There are a number of varieties of attractive white flowered and showy berried *Viburnum*, but the old *Viburnum Opulis* is by far the handsomest for an all year shrub, as it does not only produce attractive white blooms, but these are followed by shiny-red berries for its winter beauty and when laden with large clusters of brilliant crimson berries persistent through the cold winter months makes it most desirable.

Viburnum Opulis Sterilis (Common Snowball)—The old-fashioned sort, producing its large globular clusters of pure white flowers in May and June. Most everybody wants a few, as they bring back memories of the old home, and too, make a very attractive appearance.

	Each	Per 10
1 to 2 feet	\$.30	\$2.50
2 to 3 feet50	4.00
Large specimens	1.00	7.50

Snowberry Red (Red Indian Currant)—Similar to the *Snowberry*, except that its fruits are red and that the small red berries cluster in thick ropes around the weighed-down stems.

Snowberry White—Flowers rose color. Blooms in June and July, followed by large clusters of milk-white fruits, which remain on in winter.

	Each	Per 10
2 to 3 feet, heavy plants....	\$.50	\$4.00

LILACS

Syringa Vulgaris (Single Lilac)

Persian Lilac—Five to six feet high with slender upright branches. Foliage rich green, blooming in early spring with pale lilac-colored flowers. Fragrant and popular variety.

	Each	Per 10
2 to 3 feet.....	\$.75	\$ 7.00

PHILADELPHUS

Philadelphus Syringa or Mock Orange—The *Syringa* is an invaluable shrub of vigorous habit. Hardy with large handsome foliage, this variety bearing beautiful white flowers. Valuable in any collection of shrubbery.

Philadelphus Coronarus—A well known shrub, with pure white flowers, and a very early bloomer.

Philadelphus Grandiflora — Foliage bright green, blooms in June, has large white flowers, with the exception of the center which is yellow.

Philadelphus Lemoinei—Branches slender and arching, flowers double in large racemes, very sweet scented, and a dwarfish grower.

	Each	Per 10

HYPERICUMS

Hypericum Aureum—Large flowered St. John's Wort. Useful for edging borders, grouping among shrubbery and evergreen plantings.

Hypericum Densiflorum — Dense flowered. Handsome shrub with numerous branches, attaining a height of 3 to 4 feet. Flowers very numerous, in compound clusters of golden yellow. This variety and Aureum are perfectly hardy, where the Moserianum is only half hardy, and many times winterkill.

	Each	Per 10
1 to 2 feet	\$.35	\$3.09
2 to 3 feet50	4.00

Flowering Crab (Pyrus)—Chinese Flowering Crab. A small tree with symmetrical broad crown, native of China. Has deep purple flowers and reddish yellow fruit. Hardy, desirable and early flowering.

	Each
2 feet	\$1.00

POTENTILLA

Potentilla (Fruticosa)—A beautiful hardy shrub having distinctive narrow fuzzy leaves, growing to a height of 2 to 3 feet. Rather round in form and succeeds almost anywhere. Fine in dry soil. Has yellow blooms which resemble Hypericum but are not quite as large, and blooming freely from June until frost. Is especially fine for banking among other shrubbery, and most valuable for planting among evergreens owing to its attractive foliage and flowers. For shrubbery and perennial borders or as specimen plants.

	Each	Per 10
12 to 18-inch	\$.40	\$3.50
18 to 24-inch50	5.00
24 to 30-inch75	7.00

SPIREAS

Planting of Spirea Van Houttei

Spirea Anthony Waterer—A fine variety of the Spirea, growing about two feet high, covering themselves with blooms from June until frost. It is more dwarfish than the other Spireas. The blooms are of a rosy crimson which almost constantly cover the plant. This is a valuable addition to the shrubbery garden.

	Each	Per 10
12 to 18-inch....	\$.40	\$3.50
18 to 24-inch....	.60	5.00
2 to 3 feet....	.75	7.00

Spirea Van Houttei (Bridal Wreath) — Has numerous arching branches, foliage dark green, persisting until late autumn, blossoms in late spring, the white flowers often bending the branches in graceful curves to the ground under their profusion. The most popular sort for specimens or hedges.

	Each	Per 10
12 to 18-inch, 2-year old bushy plants..	\$.25	\$2.50
18 to 24-inch..	.35	3.00
2 to 3 feet50	5.00

Jasminum Nudiflorum—This is an evergreen in the South. The stems are a dark shiny green and during mild winter weather regardless of the calendar, its sunny clear flowers appear thickly along the branches. It is hardy, easy to grow, and a place can always be found for it about the flower garden. It will begin to bear its pretty yellow flowers while quite young. Many cotton mills and other corporations buy these in large lots for their planting.

	Each	Per 10
1-year plants	\$.25	\$2.00
2-year plants40	3.50

Cydonia Japonica (Burning Bush or Japanese Flowering Quince)—Covers itself with large showy scarlet flowers in early spring, followed by yellowish colored fruit, which is two inches in diameter, and very fragrant. A splendid shrub for use among foundation planting, for massing in terraces, drives or walks. Everyone wants a few of its perfumed like fruit.

	Each	Per 10
1 to 2 feet	\$.35	\$3.00
2 to 3 feet50	4.00

WEIGELIAS

Weigelia Candida — Pure white flowers, strong grower, but has a refined appearance.

Weigelia Rosea—Fine shrub with handsome rose colored flowers, which blooms in early spring. Perfectly hardy and occupies a prominent place in other shrubbery.

Weigelia Hendersonia — Fine, compact habit, flowers medium size, outside of petals red.

	Each	Per 10
1 to 2 feet....	\$.30	\$2.50
2 to 3 feet....	.50	4.50

HEDGE PLANTS

We can supply any variety of hedge plant at very reasonable cost, as we grow in quantity, shipping thousands every year to nurserymen for their retail trade, as well as supplying our own retail trade, shipping to almost every state in the Union. We have numerous large orders from land improvement companies, cotton mills, schools, parks, towns and cities.

PRIVET

California (Ovaliforum)—A well known and popular variety, is a vigorous grower, with deep green foliage, used much for hedges and borders, but will winterkill occasionally in the

colder sections, though in the South generally it is very nearly an evergreen.

	Per 10	Per 100	Per 1000
12 to 18-inch	\$1.50	\$4.00	\$40.00
18 to 24-inch	2.00	6.00	60.00

Amoor River Privet Hedge

Amoor River Privet (Evergreen)—This is a fast growing hedge either in sun or shade, and bears trimming into any desired shape. We hold this stock in storage until July and August from which we can make prompt shipment of plants that will prove satisfactory. Several years ago we shipped 2,000 to a Georgia nurseryman in July, who afterwards wrote us that he never had better success, that it all lived and grew off nicely.

	Per 10	Per 100	Per 1000
12 to 18-inch	\$2.00	\$6.00	\$50.00
18 to 24-inch	3.00	7.50	70.00
24 to 30-inch	4.00	9.00	80.00

We can supply small well rooted and branched plants, every one a fine little plant, delivered prepaid to any address, at \$5.00 per hundred. The only difference in this and the 12 to 18-inch stock as listed above is that they are little smaller plants, but stocky little fellows. We sell lots of them, as they soon make a pretty hedge, and for long distance there is some saving in transportation charges.

Privet. Northern type. Amoor River north—This variety is not an evergreen, but it is the kind that is hardy in Minnesota and other like cold climates. In habit of growth it is very much like the old California privet but does not winterkill and is a most valuable variety, which is fast taking the place of California.

	Per 10	Per 100	Per 1000
12 to 18-inch.....	\$2.50	\$6.00	\$50.00
18 to 24-inch.....	3.00	7.50	65.00

Thunberg's Barberry—A beautiful shrub that is hardy anywhere. Even in cold Alberta, Canada, where the thermometer for months during the winter hovers around 40 degrees below, one of our customers grows it success-

fully. Has small round bright-green leaves, changing in autumn to a beautiful shade of orange scarlet and crimson, bearing bright red berries in profusion which do not drop off until late in the spring.

For low hedge or borders there is no better hedge plant in existence. After the little yellow bloom in the spring it is followed by berries which hang on through the winter. The foliage coloring up nicely in September to a beautiful shade of scarlet and crimson. When this has shed the beautiful red berries appear, which are very attractive. The plant needs no trimming, grows to a height of 2½ feet. It should be planted about 10 inches apart for hedges, and worked, the grass and weeds kept down and the soil well cultivated for one or two seasons after which it can be left alone when it will grow into a shapely, slightly drooping, graceful hedge or border. They are also much used among group planting.

HARDY DECIDUOUS SHADE TREES

The following list represents the most lasting and popular sorts of deciduous ornamental trees. We sell these in large quantities to towns, cities, schools, mill owners and land improvement companies.

Sugar and Norway Maples are among the most popular sorts, as they are of hard wood, free from insects and diseases, and do not break up by storms or snow as the soft wooded and many other varieties. They make pretty well-formed tops and we have never had a dissatisfied customer who purchased these sorts. If you wish a good shapely hardy and lasting tree these will please you.

	Each	Per 10

FRUIT TREES

APPLES

Parties desiring to plant commercial orchards will do well to correspond with us before placing their order. We can make special prices on most all varieties in quantity lots.

Price, 40c each, \$3.50 per 10 unless otherwise noted.

Red June—A well known and good variety, ripening the last of June.

Early Harvest—Medium size yellow apple; ripening about harvest time. Tender, delicious and of good quality.

Yellow Horse—An old popular and well known variety. Should be planted in every orchard. It is one of the best apples for pies ripening near its time. Begins to ripen in July and continues until late in August.

Fall Pippin—Large, flesh creamy white, extra quality.

Red Limbertwig—Succeeds better in the mountains or hilly sections of the country, where it is a good bearer and one of the best keeping apples. In the cotton belt or lowlands it is a good bearer but does not keep well.

Baldwin—This is one of the best apples for commercial purposes and justly so, as the tree is a strong grower and produces heavy crops

of large fruit of rounded form, deep red in color, flesh rich, crisp and juicy.

Gano—Similar to the Ben Davis and has all its good qualities in a higher degree. A deep coloring, runs more even in size and keeps fully as well. The tree is a vigorous, hardy and rapid grower, beginning to bear very young. Color bright red.

Grimes Golden—Originated in Virginia. Keeps well until last of January. It has a vigorous, upright spreading habit and is an annual bearer of fruit above medium size. Rich golden-yellow with flesh yellow, firm, crisp, aromatic and rich; of the best and most valuable winter sorts.

Rome Beauty—Fruit large, bright red with yellow background, flesh tender, juicy and of good quality. The large size and beautiful appearance of this apple renders it popular as an orchard variety.

Mammoth Black Twig—Many claim this valuable variety excels Winesap. It is a better grower, more hardy, the fruit larger, color a darker red and flesh firmer. Valuable keeping variety.

Stayman's Winesap—This variety is attracting much attention and is a profitable market sort, of large size, bright red color, very pro-

ductive and of the best quality. The tree is a good grower, drooping in habit and adapted to all soil and situations. A good keeping variety.

Hollow Log—Originated in Rutherford County, North Carolina, being a seedling found near a hollow log, hence its name. This is a valuable variety and a strong grower. Makes an upright and well formed tree that, owing to its lateness of bloom, seldom fails to produce annually an abundant crop. Another strong point in favor of this variety is in its ripening period, beginning to ripen last of June and continuing through July and into August. It is almost a sure bearer of large fruit, deep yellow

low in color, tender, crisp, very juicy and with a most delicious aromatic spicy flavor. It has no superior as an eating and cooking apple. Wherever known, it is said to be the best apple in cultivation. We have only a limited number of these trees and have never been able to supply the demand. Parties desiring same had best place their orders early. We have sold these trees to many different sections of the country and we have never had a complaint from them. We believe they will succeed wherever other apples succeed and more generally so on account of their late blooming period. Do not fail to plant some Hollow Log.

Price \$1.00 each, 6 for \$5.00.

PEACHES

Mayflower—The earliest peach. A cling of rich red color which makes it valuable for market and most salable on account of its ripening so early. Excellent for home too, as older people as well as children look forward to the ripening of early peaches. It is said to be one of the best bearers owing to its being the latest to bloom which makes it most free from frost and more certain to bear.

Greensboro—Flesh is very juicy, white and tender, good quality for early variety. Ripens about ten days after the Mayflower.

Red Bird Cling—One of the best early cling peaches. Medium size and valuable early cling.

Triumph—The earliest yellow flesh peach. Late bloomer and bears many times when others are killed by the frost. Ripens about the first of July.

Carmen—Large free-stone, creamy white with red cheek, flesh tender, white, tinted with red near the seed. Does well in many localities where many peaches fail. It belongs to the

Peach growing is becoming a most profitable industry in the sand hills and many other sections in North Carolina. The trees bear so young and thrive so generally over the entire country that it is little wonder so many people have engaged in the growing of them. Peaches cannot be expected to bear every season in all sections, but where one does not grow them for commercial purposes it usually pays an owner of even a small lot to plant a few peach trees as they can be planted close together and take up little room and may be expected to bear most every season. Even a few trees well cared for will give one lots of pleasure and fruit. If a tree is worth planting, it is worth taking care of afterwards. To avoid scale and fungus diseases, spray with Bordeaux mixture or Lime Sulphur Solution. The Entomologist of your state will be pleased to send you bulletin on request, giving information and directions for spraying.

Price, 3 to 5 feet \$3.50 per 10.

hardy North China group and like Alberta, and ripens early in July.

Foster—Yellow meated free-stone, sweet and juicy and excellent flavor. Fine for home use but not a good shipper. Ripens last of July.

Alberta—Everybody knows this variety and hence it needs no description. Ripens about August first.

Chinese Cling—This is a well known variety, good for home or shipping. Ripens about the time or a little later than the Alberta.

Lemon Cling—Pale yellow cling with dark red cheek about as large as Alberta. One of the best for eating and canning.

Indian or Blood Cling—Large, dark with deep red veins. Flesh red and very juicy. An old and valuable variety. No better cling grown.

Stinson's October Cling—Large and of fine quality, the best peach in cultivation, either for home or market.

CHERRY TREES

There are few more desirable fruits than the cherry. They are being planted more and more each year and there is always a good demand for them. They make valuable ornamental trees on the lawn as well as being an early ripening fruit. They are strong, vigorous growers with large, glossy leaves that thrive in most any soil. There are not many poor cherries, at least the writer has seen many varieties and has seldom, if ever, found a poor one. No

home or garden is complete without a few cherry trees.

Price \$1.00 each.

May Duke—Large, dark red, juicy, rich and of superior quality.

Ostheim—Large, roundish, of dark red when fully ripe. Flesh tender, juicy, sub-acid and very good. Ripens early and over a long period.

Yellow Spanish—Pale yellow with red cheek. Flesh firm, juicy and excellent, vigorous and very productive; one of the best light colored cherries yet introduced. Ripens in June.

Governor Wood—Large, rich, light yellow with red cheek, juicy and sweet.

Black Tartarin—Very large, purplish-black;

very juicy, rich and of excellent flavor. The tree is a well known and popular variety.

Large Montmorency—Large roundish, red; flesh tender and of good quality. Ten days later than Early Richmond. A most popular kind and one of the best for Western North Carolina.

Early Richmond—An old and well known variety; ripens early.

JAPANESE PLUMS

This is not only one of the most beautiful and delicious, but one of the most wholesome of all fruits that grow. Even invalids eat them, it is said, with positive benefit. They succeed in almost any kind of soil. This is an excellent dessert fruit, of rich flavor, and unsurpassed for home use and profitable for market. The Japanese varieties are inclined to overbear and should be thinned when about one-third grown. They are extremely hardy and begin to bear while very young.

Price, 75c each, \$7.00 per 10.

Abundance—Medium to large, bright red over

yellow; flesh yellow, firm, juicy and sweet. Comes into bearing while quite young and yields abundantly.

Burbank—Medium to large, of orange yellow in color dotted with red; flesh is yellow, sweet, juicy and a good canning and market variety.

Kelsey—A vigorous and upright grower; very large and productive, being sometimes as large as an ordinary peach. Dark red, firm skin, flesh yellow, sweet, rich and of a very fine quality.

PEAR TREES

When pear trees are heavily laden they should be thinned out when about one-third grown, else the fruit will be poor and the tree injured. The dwarf varieties are especially recommended, as they are good growers, coming into bearing very young, sometimes while yet in the nursery rows. Longer lived, of stronger growth and not so subject to blight.

Price, 75c each; \$6.50 per 10.

Early Harvest—Medium size, greenish-yellow, sweet and juicy. July.

Bartlett—One of the most popular varieties. It is an excellent eating pear; flesh tender, juicy and good, having a rich and delicious flavor.

Keiffer—Large, golden yellow. Largely planted

for commercial purposes, being an early and great yielder. The tree is inclined to break if a part of the fruit is not thinned out, which will not injure the crop or tree, and by all means should be done lest the tree should be damaged.

Seckel—The standard of excellence in pears, small but of highest flavor. This and the Bartlett are two of the best known dwarf varieties.

Garber—A well known variety and a good bearer.

Magnolia—A good bearer, large and valuable fruit. The fruit is nearly round in form and deep yellow in color, having rich, sweet, juicy and excellent flavor. Ripens last of September.

DWARF PEARS (Grafted on Quince Roots)

These make beautiful little trees, and are many times planted on the lawn. They do not take up much room, make a beautiful form and are worthy of being planted as ornamental trees. Do not fail to include some dwarf pears

with your order. We can supply them in varieties as follows: Seckel, Duchess d'Angouleme and Bartlett.

Price \$1.00 each.

NUT BEARING TREES—GROW THEM FOR PROFIT

ENGLISH WALNUTS

The well known commercial nut. Needs no description. Should be more generally planted.

	Each	Per 10
2 to 3 feet	\$1.00	\$7.50

PECANS

Of all the nuts grown in the world, none compare with the Pecan. Trees grow easily, are sure to bear good crops, live for generations, require no care after being well established, and the market for good nuts will never be glutted and they will always command a good price.

For home use, everyone should plant Pecan

trees. Besides producing an abundance of rich, nutritious, wholesome food, they are highly ornamental and become magnificent and lasting shade trees. They grow in almost any soil and in any location.

Stuart—Size large; long, pointed; shell thin; meats plump, full, separating easily; quality best; recommended by horticulturists, and the most popular sort for Southern planting. A good grower.

Van Deman Pecan — Large; oblong shell, moderately thin; cracks well; meats plump and full, of good quality.

	Each	Per 10
2 to 3 feet.....	\$1.25	\$12.00
3 to 4 feet	1.50	15.00

SMALL FRUITS

GRAPES

Grapes are one of the most productive and hardy fruits that we have. They can be grown in small spaces and trained up the sides of buildings or along fences, occupying very little room. Make the soil mellow and plant vines about 6 feet apart.

A Wonderful Grape

Old English Grape—We secured our stock plants of this variety from our friend and horticulturist, Joe DePriest. This grape has been in his immediate family for over one hundred years. In fact, his father and grandfather grew it before him, and why it was called by these old settlers "The Old English" he does not know unless it was brought by them in coming to this country. He has never seen or heard of but one other vine that was of the same variety—this was grown by an old settler who has long been dead, and the place has many years ago gone down, and the vines from which we have secured our propagating plants are the only ones now known.

The vine is a strong grower, with large, healthy and fine foliage, which is not very particular in its growth as to its location, as is shown by some of these bearing vines, which this old horticulturist, who is one of the greatest fruit lovers we have ever known, has growing, not only on trellises and arbors, but some of them trained on growing trees, where it ripens to perfection, even among the shady foliage. It is a most delicious variety. If it ripened among the general run of bunch grapes, it would stand out pre-eminently as one of the most valuable sorts, but yet another and a most valuable characteristic about it is that it does not ripen until the last of September and early October after all other bunch grapes are gone. In color it is a light pink to red, which ripens up splendidly, the bunches being well shouldered and medium large, and do not crowd on the bunches.

We have attempted several times to secure a supply of these vines, but have never been able to propagate them in quantity until this year. We have a limited number of splendid and well rooted one-year vines. We haven't enough of them to supply them in quantity for commercial purposes at present, and being desirous of supplying even a few vines to as many of our customers all over the country as possible, we would not like to offer more than a half dozen vines to a customer. We would advise parties who wish to secure them to notify us at once that we may be able to supply them.

We have had inquiries from various northern and eastern states to know if this variety would succeed there and we certainly believe that it will, and for commercial purposes when the plants can be had in sufficient quantity we believe that it will prove the most profitable variety yet introduced. For home and family use, it certainly has not an equal in the entire list. Mr. DePriest says they will hang on the vines until frost, and that they will keep for weeks in perfect condition after being picked, this with their late ripening period makes them

a most profitable variety, being almost certain to bear every year, having known Mr. DePriest for nearly twenty years and never knew him to fail to have a crop of these grapes.

I do not see how an owner of even a small lot can afford not to plant at least a couple of these vines. At this writing we are unable to tell just how many we will have, but if interested write for prices, and if unable to supply you now, we will possibly be able to do so the coming season.

Agawam—Large, round, early, dark red or brown; large bunched berries, meaty and free from sour pulp; has tough skin and bees never attack it; in flavor it is sprightly, moderately sweet. Midseason.

Concord—The most popular and widely planted black grape. Very hardy and productive. Ripens about the middle of September. Because of its adaptability and low cost of production Concord is widely planted for both home and commercial use.

Niagara—Large, slightly oval; pale yellow with a white bloom; the quality is equal to Concord and is the standard white grape of the country. Bunches are large and compact. Vine vigorous, hardy and very productive.

Moore's Early—Very large, round, black with a blue bloom, quality very fine and is classed as better and sweeter than Concord. Extremely hardy and productive.

	Each	Per 10
Price, well rooted vines.....	\$.30	\$2.50

Lutie—Rich red, a good grape; succeeds better in the South; vigorous heavy bearer and always dependable.

Green Mountain—From the Green Mountains of Vermont. Bunches rather large, and shouldered. Berries medium, greenish white; thin skin, juicy with tender and sweet pulp.

	Each	Per 10
Price Lutie and Green Mountain	\$.60	\$5.00

Scuppernong—Large, bronze-colored berry. Flesh sweet, pulpy and vinous. The most popular grape on the Southern market. Supply is seldom equal to the demand. Vines produce abundantly. Scuppernong wine is considered among the best.

	Each	Per 10
Price	\$.60	\$5.50

Brighton—Medium in size, red, flesh rich, sweet and of the best quality. Ripens earlier than Delaware. Vinous, vigorous and very hardy. Early.

Delaware—Berries rather small, round, skin thin, light red, flesh juicy without any hard pulp; sweet and spicy and delicious flavor. Vine moderately vigorous, hardy and productive. Midseason.

	Each	Per 10
Brighton and Delaware well rooted vines	\$.50	\$4.00

BLACKBERRIES

The Crop That Will Make You Money—Quick

Blackberries or dewberries make the best paying crops—five acres in berries will earn as much as 40 acres in corn or wheat, with less than one-eighth the upkeep or labor. Try

out one-fourth, or better still, one acre; plant in rows or "hill fashion." Plant in rows 3 feet apart in your orchard. Make every foot of ground pay. Berries bring good prices and will go still higher.

Early Harvest—The first to ripen—a most productive early bearer. Fruit medium size, roundish-oblong. Flesh tender, juice mild and of good quality. The very best early variety.

Snyder—Extremely hardy, enormously productive, medium size, no hard, sour core. Easy to pick, fruit in clusters, mostly on top like raspberries.

Eldorado—Very vigorous and hardy, enduring the winters of the Northwest without in-

jury, and their yield is enormous. The berries are large, jet black, borne in clusters, and ripen well together; they are very sweet, melting and pleasing to the taste; have no hard core.

Rathbun—Berries very large; sweet, luscious; have no core and are firm enough to ship and handle well; canes make a strong erect growth, yielding fine crops.

	Each	Per 10	Per 100
Price strong plants.....	\$.15	\$1.00	\$6.00

DEWBERRIES

Plant in rows six feet apart, three feet distant in the rows, keep the soil mellow and clean.

Lucretia—The very best of the dewberry family. Berries are far larger and incomparably better than any blackberry; of un-

equalled excellence. The Lucretia Dewberry has received the highest praise from the best horticulturists in the country. Hardy, a great bearer, fruit large, black and glossy, without hard core and very delicious. Ripens early.

	Each	Per 10	Per 100
Price, strong plants....	\$.15	\$1.00	\$5.00

HARDY CLIMBING VINES

Probably there is no element of decorative planting that is more essential than the climbing vine families. They produce the desired effect and mass backgrounds of green so restful and pleasing to the human eye while occupying the minimum of space, and upon brick or stone houses a few of the Ivy family is especially desirable to break the monotony of the mass effects of black walls.

BIGNONIA—Trumpet Vine

B. Radicans (American Climbing Trumpet Vine)—A splendid hardy climbing plant with large trumpet-shape scarlet flowers.

	Each	Per 10
Strong 2-year old plants....	\$.60	\$5.00

AMPELOPSIS

American Ivy or Virginia Creeper—

The well-known native vine with five parted leaves that change to rich crimson in autumn, berries are a blue-black. Very rapid grower and entirely hardy. One of the finest for covering walls, verandas, trunks of trees.

	Each	Per 10
Price	\$.60	\$5.00

Engelmanni (Engelmann Ivy) — Shorter jointed than Quinquifolia. A good climber, grows 6 to 10 feet in season.

Veitchi (Boston Ivy) — Of Japanese origin, entirely hardy, with foliage turning brilliant red in autumn. It clings tightly to walls, and is unsurpassed as a basket or vase plant.

	Each	Per 10
Strong Plants	\$.75	\$6.50

ARISTOLOCHIA—Dutchman's Pipe

A. Siphon—A magnificent vine of climbing habit, with beautiful foliage, 8 to 10 inches in diameter and curious shaped yellowish-brown flowers.

	Each	Per 10
Strong plants	\$.75	\$6.50

CLEMATIS

A beautiful class of hardy climbers, excellent for pillars or trellises. They delight in a rich soil and sunny situations and are perfectly hardy.

C. Paniculata—A vine of very rapid growth, quickly covering trellises and arbors with hand-

some glossy-green foliage. The flowers are of medium size, pure white, borne in immense sheets and of a most delicious and penetrating fragrance.

	Each	Per 10
Strong 2-year old plants	\$.50	\$4.00

HONEYSUCKLE

Japanese Bush Honeysuckle (L. Morrowi)—Four to six feet high with spreading branches, dark green with light underside. Blooms from early spring until fall.

	Each	Per 10
Price, 2-year, strong	\$.50	\$4.00
Price, 1-year	.30	2.50

Hall's Japan Honeysuckle (Lonicera Halliana)—Pure white and creamy yellow, very fragrant flowers, in bloom the whole season. Almost evergreen. Besides its ordinary uses as a climber it is valuable for covering banks, bare places, etc., where grass will not grow.

	Each	Per 10
Price, 2-year, strong	\$.50	\$4.00
Price, 1-year	.30	2.50

WISTARIA

The Wistaria is one of the most decorative of vines, and for porch decoration without too much shade it has no superior. The long twining branches bear great sprays of foliage, while its charming flowers sway with every passing breeze.

W. Sinensis (Chinese) — Flowers in clusters, pale blue, sometimes gives a second crop of flowers in the fall.

	Each	Per 10
Strong 2-year old plants	\$.50	\$4.00

W. Sinensis Alba—Of similar habit to Chinensis, with pure white flowers.

	Each	Per 10
Strong 2-year old plants	\$.50	\$4.00

ORNAMENTAL FERNS

In winter every home needs a touch of living green inside. Hallways can be made exceedingly attractive by the addition of a few ornamental ferns. The dining and living-room also will immediately assume a more inviting and cozy look when a few of these graceful lovely plants are used. Order a dozen ferns now and grow them yourself for Christmas gifts.

Wilsonii—Has peculiar shaped foliage. A good healthy grower and one of the finest of all dish ferns.

Whitmanii—Rather dwarf in growth but very graceful, compact and feathery. Each frond has a double row of perfect little fronds set at right angles to the mid-rib.

Boston—A rapid growing, graceful house fern, and many people prefer this to any other variety. It thrives in any ordinary living-room and specimen plants can be grown with fronds 5 to 6 feet in length. The sword-like fronds are produced in bewildering masses, arching, curving and strikingly beautiful. On account of its large growth the Boston Fern is particularly useful for hall decoration, where it can be placed on a stand and left undisturbed.

Roosevelt—In general characteristic it resembles the world-famous Boston Fern, but it is superior to it for two reasons. It produces many more fronds than the Boston making a

bushier and handsomer plant. Then the pinnae are beautifully undulated, giving the Roosevelt a pronounced wavy effect, that is seen in no other fern.

Asparagus Plumosa—Leaves bright green, arched as finely woven as the finest silk mesh. Their lasting quality when cut is remarkable, retaining freshness for weeks, hence it ranks as the most valuable plant we have for this purpose. It is also fine for hanging baskets and jardinières.

Asparagus Sprengeri—A desirable species, useful as a pot plant or baskets, fronds frequently four feet long, a rich shade of green retaining their freshness for weeks after cutting. A fine house plant, as it withstands dry atmosphere.

	Each	Per 10
Small plants	\$.25	\$2.25
Medium size	.50	4.00
Large	1.00	

Wanamaker—Has long narrow graceful drooping fronds and is very compact, but does not decay in the center. A durable house fern, rapid grower, making an abundance of fronds. Very distinct from other ferns.

	Each
Small plants	\$.25
Larger plants	.50

EVERGREEN VINES

In most varieties of vines we can supply either field-grown or pot plants. If it is desired that these plants should be moved during the summer months, it is best to get pot grown plants. These cost a little more but can be

successfully moved any season of the year. Would be glad to quote on pot grown plants on request. The prices quoted are on field-grown plants for shipment while dormant from September to May.

English Ivy (Hedera Helix)—An old and popular evergreen vine. It is excellent for covering walls, tree trunks or unsightly objects. Grows in almost any soil, but succeeds best in rich soil, and does splendidly in shaded positions. Sometimes it is hard to get these vines to cling to the walls, in which case plant Boston Ivy among them and it will quickly cover any wall and at the same time support the English Ivy and keep the walls cool and green.

Do not worry about the Boston Ivy interfering with the English Ivy because after the English Ivy is well started it will quickly kill out the Boston Ivy, when it once covers the wall.

It is a most popular vine for covering cotton mills or other manufacturing establishments, as well as brick or rock walls of homes, trellises or other objects where continuous green is desired.

BEAUTIFYING YOUR HOME GROUNDS PAYS BIG DIVIDENDS

Your new house may be all that you can ask, substantial and costly, even to the millionaire's liking, but the attractiveness lies in its surroundings, no home being complete until beautified, which enhances the value so quickly and brings that charm and fascination all its own. Don't wait. Write our landscape department for information now.

"Many a man practical and successful in his own business will give his order to the lowest bidder among nurserymen and waste years looking at sickly, struggling or dying trees, shrubs and perennials about his home, rather than invest a little more money and get satisfaction and joy from the start."

Why wait years to secure effect, when you can buy from this Catalog large evergreens and ornamentals that bring beauty now?

ROSES

The very name of roses carries with it the suggestion of the greatest perfection and beauty of the world of vegetation. No arrangement is satisfactory that neglects them, in fact they are indispensable. The stock we offer is all field-grown, acclimated to the outdoor life and will make much quicker and more hardy growth than the greenhouse plants offered by rose specialists.

Hardy Everblooming Varieties

The everblooming roses are especially desirable for their profuse and continuous bloom, fragrance of their bloom, and the delicate beauty of their buds.

Killarney Pink—One of the most beautiful roses grown, strong, vigorous and perfectly hardy. Flowers are very large, buds long and pointed. Color an exquisite shade of deep seashell-pink.

Killarney White—An offspring of the pink with all the exquisite beauty of the parent in size and shape.

Killarney Brilliant—A very fine shining red rose. Has beautifully formed buds, as the other Killarney. In nature of bloom, growth and hardness it is the same. Beautiful red rose.

Mrs. Geo. Sawyer—Brilliant rose-pink or bright peach-pink. Flowers large, well formed, fairly full with petals of good substance. Freer in growth and bloom than Killarney, breaks in rapid succession, throwing up three to four foot canes, every shoot tipped with a bud.

Richmond—This is said to be the best red variety yet produced. Strong grower. Color deep red, long buds, elegant dark foliage.

	Each	Per 10
2-year strong plants	\$.60	\$5.50

Ophelia—Brilliant salmon-flesh shaded with rose on outer edge of petals with a heart of glowing peach-pink and orange yellow blendings. Fragrant as Richmond. Perfect flowers on long stiff stems. Free from mildew.

Sunburst—This magnificent grand yellow rose ranks in value and grandeur with the American Beauty. Pointed buds, color orange copper or golden and orange yellow, extremely brilliant in effect. This is the finest yellow rose in cultivation and pleases every one who sees it. Many grow it in preference to White American Beauty and other leading roses. It puts all the yellows to sleep when it comes to bedding in the garden. The golden yellow stays right with the flower until the last. Be sure to include a few Sunburst.

Mrs. Chas. Russell—A fine new rose of American origin, considered equal to and we believe better than the American Beauty. Has strong large buds, produced on long stiff stems. It is crowned with a bloom of a beautiful shade of rosy-pink. Blooms large, double with full and magnificent formation.

	Each	Per 10
2-year	\$.75	\$ 7.00
3-year strong plants	1.25	12.00

Los Angeles—We consider ourselves very

fortunate in having been able to secure a number of this sensational new rose. It is described by various rose growers as the finest all-round rose ever introduced. The stems are long and stout, and in growth resembles the American Beauty. Its very large and attractive flowers, freedom and continuous blooms, make it a most remarkable sort. It is described as shining with translucent gold at the base of petals, but its beautiful flame pink color underneath the petals with its distinctly different coloring on the face of the petals from cream to a tainted streak of yellow with a slight gold-like or coppery coloring at the base of the petals, seems to us to be a better description of its beautiful flowers which appear on the plants. A most attractive rose and should be included in every collection.

	Each
Price	\$1.50

White American Beauty—Snow-white flowers four to five inches across, deliciously fragrant. This magnificent rose has taken first prize at all the great flower shows of Europe. Makes splendid buds and immense flowers, perfectly double and delightfully fragrant; large thick petals, very durable and handsome. Has bright shining green leaves, elegantly veined, vigorous healthy grower, entirely hardy and a constant and abundant bloomer. Recommended as the most beautiful and satisfactory snow-white hardy perpetual blooming rose.

	Each	Per 10
Price, 2-year strong plants	\$1.00	\$8.00

CLIMBING ROSES

*American Beauty Climbing Rose*

The demand for climbing roses has always been constant. The rose-covered cottage still carries the charms of romance and sentiment that it has done for hundreds of years. We have specialized on all these beautiful climb-

ers, and here we offer the best.

Pink Dorothy Perkins—A splendid new climbing rose. In foliage and habit of growth it is remarkably like Crimson Rambler. The flowers are double, of good size, and borne in

clusters. The petals are very prettily rolled back and crinkled, the buds remarkably handsome, color a clear shell pink and holds a long time without fading.

Red Dorothy Perkins — It is a good deal to claim for a rose, but we are within bounds when we describe Excelsa as a brilliant Crimson Rambler, flowers on glossy varnished Wichuraiana foliage. The flowers are very double, produced in large trusses of thirty to forty and almost every eye on a shoot produces clusters of flowers. The color is intense crimson maroon, the tips of the petals tinged with scarlet. The finest of all Crimson Ramblers.

White Dorothy Perkins—This beautiful rose is the counterpart of the well-known Dorothy Perkins, except in the color, which is pure white, but it is quite as hardy and vigorous. It has now become a universal favorite.

Flower of Fairfield (Everblooming Crimson Rambler)—Similar to the Crimson Rambler, except that it blooms from early spring until frost. A rampant climber, but not a persistent bloomer.

Climbing American Beauty—The great and popular American Beauty Rose in a real climbing form. It has all the characteristics of its relative, including form and fragrance.

Lady Gay—Flowers of a delicate cherry pink color, which fades to a soft white. It has deep green foliage, a vigorous grower and perfectly hardy. Will cover a large porch or trellis in an incredibly short time. One of the most charming of all climbers.

	Each	Per 10
1-year plants	\$.35	\$ 3.00
2-year plants65	6.00
3-year plants, heavy	1.00	10.00

Silver Moon — Hardy Climber. Blooms very large, three or four inches in diameter, pure white in color and of good substance, beautifully cupped, forming a clematis-like flower. The large bunch of yellow stamens in the center makes it very attractive. The blooms are produced on long stems 12 to 15 inches in length. Sweetly scented and a rank grower. It is different from all other roses, and has beautiful glossy-green foliage. Will add attraction to any collection where running roses are used.

	Each	Per 10
1-year old	\$.35	\$3.00
2-year old75	7.00
3-year old	1.25	12.00

Dr. W. Van Fleet—Flowers, when open, run four inches and over in diameter. The center is built high, petals beautifully undulated and cupped. The color is a remarkable delicate shade of flesh-pink on the outer surface, deepening to rosy flesh in the center. The flowers are full double, of delicate perfume, buds pointed. A strong and rapid grower. Immune from insects and disease. Foliage deep green the entire growing season.

	Each	Per 10
1-year	\$.35	\$ 3.00

2-year strong plants.....	\$.50	\$4.00

We have many other roses not listed here, and if you do not see what you want, write us about it. We can no doubt supply you.

Climbing Clothilde Soupert—Color white, shading in center to silvery-rose. In bloom all the time from May to frost, of healthy, vigorous habit, not subject to disease or insects. One of the most satisfactory, hardy ever-blooming climbers.

Climbing White Cochet — From Australia. Has awakened a lively interest among rose growers. Flowers are large, double and white, like the bush White Cochet Rose.

Golden Rambler—One of the prettiest ramblers, has golden yellow flowers. Very popular variety.

	Each	Per 10
2-year strong runners	\$.75	\$ 7.00

Huganisi—This is a rare new rose from China, and is as hardy as an oak. The color is an intense canary yellow, very bright and attractive, and the plant is noteworthy all the growing season by reason of its dainty foliage. When in bloom the entire plant is covered with its bright yellow blossoms and buds. It is in great demand, there being nothing like enough to supply the demand. We paid \$1.50 each for our stock plants which were only little rooted cuttings. We quote you while they last.

	Each	Per 10
1-year old plants	\$1.00	\$10.00
2-year old strong plants	1.50	14.00

THERE IS ALWAYS A PLACE FOR MORE CLIMBING ROSES

"Aunt Harriet" Rose—This is the rose the Farm Journal advertised and sold so many of a year or two ago. It is said that it continues to grow in popularity and that those who had one bush as a trial now want more, that neighbors and freinds who saw it or read about it are anxious to secure it. It is said that the demand has always been greater than the supply. It is a climbing rose being a cross between Appoline and Wichuraiana, retaining the splendid characteristic qualities of both the Appoline and Wichuraiana, with brilliant scarlet petals, pure white center with golden anthers. Has clean shining foliage which is not subject to mildew. It is a good runner, will cover porch, post, stump, rock pile or mound, will arch over the gate or arbor the front door, a very distinct and climbing variety.

	Each	Per 10
Price, 1 or 2 year plants	\$.50	\$ 4.50

Evergreen Gem—A new variety of running rose which has beautiful green foliage that it retains throughout the winter. It is perfectly hardy, being free from insects and disease. Has great clusters of beautiful red blooms of from thirty to fifty in a bunch. A beautiful bouquet or a pot of these roses may be had by cutting one stem containing a cluster of its beautiful blooms.

	Each	Per 10
Price	\$.75	\$ 7.00

SWEET PEAS

To succeed best they should be sown in good soil, among which should be thoroughly mixed well rotted stable manure, digging to a depth of about a foot, will give splendid results. They bloom earlier and seem to succeed a little better if sown in November or early winter. Any time so the ground is not freezing until

the spring planting season is over, they will then bloom in the summer. They commence to bloom earlier, depending of course somewhat on the time they are sown, and if the flowers are well picked, they will continue in bloom all summer. Fine mixture Spencer variety.

Large size package, 25c.

PEONIES

There is something of magnificence about these aristocrats of flowers, as they produce an effect that one will long remember. Great gorgeous blooms, daintily dyed with the most exquisite shades from pure whites to the deepest reds, with almost every tint being shown among them. They are perfectly hardy. Requiring no protection in the severest weather, and will thrive in all kinds of soil, succeeding better in a deep mellow soil, which, if not already, can easily be made so when planting. For social functions, they are exceedingly effective and will last longer than most other flowers after being cut. They thrive everywhere in open sun or light shade, except where water is accustomed to stand.

Time for Planting—Peonies may be planted with perfect safety any time from the middle of August until the ground freezes in the fall, and in the early spring until growth is too far advanced. September and October is the best time, so they make a good root before hard winter sets in, and they usually bloom the following spring; thereby a whole year is gained since late spring planting will not bloom until a year later. They must not be expected to bloom heavily the first year, as they must have a little time in which to establish themselves but when once planted they continue to grow larger and stronger for many years. Plant so that the eyes will be four to five inches below the surface.

Andre Laurie—Big, full flowers, anemone shaped, violaceous, red, late. Owing to its good keeping qualities, its fine coloring and its

fragrance, it is one of the standard cut flower varieties.

Humei (Anderson)—Immense bloom, carmine pink, very late.

Sarah Bernhardt—Usually large, perfectly double rose-formed flowers in clusters, color of apple blossom, fragrant.

	Each	Per 10
Price 2 to 3 eyes.....	\$.75	\$7.00

Festiva Maxima—Generally considered the finest white Peony grown. Though an old variety, it has never been surpassed, and the true variety is always scarce. Color snow white, center petals touched purplish carmine, enormous, full double bloom, very broad petals, handsome foliage.

Grover Cleveland—Large, double, brilliant crimson, from mid-season to late variety. Is a good keeper, fine for cut flowers and one of the best sorts.

Theodore Roosevelt—Semi-rose type; mid-season. A variety purchased in England under number (1) and named in Holland for our ex-president. It is a deep, rich, brilliant red in color, different from any red we know and a grand peony.

Mons. Jules Elie—Very large and full globular flower, finest glossy fresh pink, deepening at the base of the petals, reflex silvery pink, broad overlapping petals, strong, vigorous grower and free bloomer, probably the finest and most perfectly formed pink Peony in existence.

	Each	Per 10
Price, 2 to 3 eyes	\$1.25	\$10.00

BULBOUS PLANTS

CANNAS

Of quick growth and tropical appearance. Throughout the summer and until they are killed by the frost they present a mass of gorgeous bloom. They will grow in any soil, but will respond quickly to liberal treatment. In groups or for background for other plants they present a brilliant display. We offer large bulbs from which may be had continuous clusters of blooms for the first season. They may be left in the ground south of Richmond, Va., and they seldom freeze.

Florence Vaughan—Flowers of the most brilliant golden yellow, dotted with brightest scarlet.

Italia—Red flowers with yellow border with heavy healthy foliage.

Chas. Henderson—4 feet. Green foliage and crimson flowers.

Burbank—3 to 4 feet. Green foliage. Canary yellow flowers.

	Each	Per 10
Price, dormant roots.....	\$.20	\$1.50

America—Bright lemon yellow with red spots.

King Humbert—Orange scarlet striped crimson. Foliage bronze, Brandywine and Wyoming.

	Each	Per 10
Price, dormant roots	\$.15	\$1.50
	Per 10	Per 100
Various other sorts	\$1.50	\$8.00

Evergreens add a distinctive touch to the landscape that cannot be obtained with other ornamentals.

We know of no investment that will give you better returns than the planting of shade trees.

CHRYSANTHEMUMS

Unaka—Strong grower with long stout stems, good foliage. Fine yellow incurved bloom from early buds. Color lavender-pink.

Mensa—Finest single white for cut flowers. A giant white of heavy substance and strong texture.

Mrs. Buckingham—The queen of singles, big flat flower with petals of wonderful texture. The loveliest shade of soft rose pink, very lasting both on and off the plant.

White Chieftain—Pure white sport of the

variety Chieftain, duplicate of the parent in all respects save color, which is a pure white. One of the best varieties in cultivation.

Golden Wedding—A grand yellow Chrysanthemum maturing in October. It is claimed by some to be the finest yellow Chrysanthemum in cultivation. Fine incurved form and fully double. 4 to 6 inches in diameter, good stem and foliage.

	Each	Per 10
Price	\$.25	\$2.00

DAHLIAS

Mina Burgle—Originated by Mr. Burgle, a Dahlia grower of California. It is claimed that this variety is the best yet introduced. Produces flowers of gigantic size and remarkably beautiful. Color a glowing and most brilliant scarlet. Flowers are of perfect decorative type, and are borne on long stems well above the foliage.

	Each	Per 10
Price	\$.50	\$4.00

Souv. de Doazon—This is a good comparison to the Sunflower. It is the largest Dahlia in existence. The color is a pleasant shade of orange-red. Flowers are full to the center and often measure 9 inches and over in diameter. Has stout stems of upright type. It should be in every garden.

	Each	Per 10
Price	\$.50	\$4.00

Mme. Henri Cayeux—A reliable variety, flowers are of the largest size with long narrow florets, forming a bloom of magnificent form. Color is a beautiful rich pink daintily tipped white.

	Each	Per 10
Price	\$.50	\$4.00

Stern—A bright primrose-yellow. Said to be superior to the Golden West, which we have grown seven to eight inches in diameter. Flowers large, long and pointed. One of the most satisfactory varieties.

	Each	Per 10
Price	\$.75	\$6.00

Winsome—Pure cream white, better than White Swan which is claimed to be one of the best white Dahlias.

	Each	Per 10
Price	\$.35	\$3.00

HYACINTHS

Hyacinths are among the most popular and satisfactory hardy flower bulbs. They succeed with every one and may be had in flower throughout the winter, grown either in pots of soil, fibre or glasses of water. Very popular for bedding.

Can mail promptly after the last of September all listed bulbs. All separate colors, Dark Blue, Pink, Red, White.

	Each	Per 10
Price	\$.15	\$1.25

TULIPS

	Per 10
Single or double	\$.75

GLADIOLI

A search of the floral kingdom, be it ever so painstaking and complete, will discover no flower to match the Gladiolus in ease of culture or another which shows so great a diversity of color in endless combination and variety. It is matchless as a cut flower. The great advancement recently effected in the size and colors of the blossoms justly entitle the Gladiolus to the position it now holds, aristocrat of the border.

The amateur gardener appreciates its sure

blooming qualities, the stored up nourishment in the bulb making certain its vigorous growth. Seldom attacked by insects or disease, it blooms under conditions which would discourage any less hardy bulb plant.

We supply only, all color mixture, which includes every imaginable color, in big large bulbs that will bloom freely the first season.

	Each	Per 10	Per 100
Price, dormant bulbs....	\$.15	\$.65	\$5.00

NARCISSI

Narcissi are fast coming to the front. They are easily grown and are unexcelled for beauty, fragrance, hardiness and value when cut for decorative purposes. Narcissi are perfectly hardy; they do well planted in any location and

increase in size and flower year after year. For outdoor culture plant bulbs in October, November, or December, 5 to 6 inches apart, according to size of bulbs. Never use fertilizer.

	Each	Per 10
Strong bulbs	\$.08	\$.75

PAPER WHITE GRANDIFLORA

Flowers pure snow-white and pure yellow, desirable for their beauty and delicious odor; forces admirably and flowers freely in dense clusters; will come into bloom as early as De-

cember. For indoor planting only. Paper Whites may also be grown in fibre or sand and water like Chinese Sacred Lilies.

	Each	Per 10
Strong plants	\$.07	\$.60

MISCELLANEOUS HARDY PERENNIALS

These are so easily grown that almost without instructions a flower lover would give them proper care. Good garden soil well spaded to a depth of one or two feet, enriched with well decayed manure of bone meal, light stirring

of the soil during the summer and a winter mulch.

Prices quoted are for good, strong, outdoor plants, not the tiny plants offered in cheap collections by parcel post.

DELPHINIUM

Hardy Larkspur—These free flowering plants can be depended upon for the necessary touch of blue in the hardy garden, producing tall spikes of dainty spurred flowers in June and at intervals till frost if cut as they fade. Phlox and Larkspur make an excellent combination as

they bloom alternately. Of easy culture and one of the most satisfactory plants in the herbaceous garden, and should be planted extensively even in the smallest garden.

	Each	Per 10
Large Flowering	\$.30	\$2.50

YUCCA—Adam's Needle

(*Filamentosa*) — Among hardy ornamental foliage and flowering plants this can be classed at the head of the list. Its broad sword-like foliage and tall branched spikes of large, fragrant, drooping, creamy-white flowers during June and July make it an effective plant for all positions, easy to grow and with little care.

	Each	Per 10
Strong plants	\$.25	\$2.00

TRITOMA

Pfitzerii (Ever-blooming)—The best variety. The flower spikes, which are produced with considerably more freedom than the old variety, grow as high as three feet, with blooms 6 to 10 inches long, which are of a rich orange-scarlet, shading to a salmon-rose on the edge.

	Each	Per 10
Strong plants	\$.25	\$2.00

SWEET WILLIAM

Sweet William (*Dianthus Barbatus*) — A well-known, attractive, free-flowering hardy perennial, producing in midsummer a splendid effect in beds and borders with their rich and varied flowers.

	Each	Per 10
Price	\$.25	\$2.00

Yucca (Filamentosa)—Adam's Needle

HOLLYHOCKS

Hollyhocks—Few hardy plants combine as many good qualities as the Hollyhocks. For planting in rows or groups on the lawn or for interspersing among shrubbery they are valuable. The flowers form perfect rosettes of the

most lovely shades of yellow, crimson, rose, pink, orange, white, etc. It requires a rich deep soil and will repay in quality and elegance of bloom any extra care.

	Each	Per 10
2-year strong plants	\$.30	\$2.50

MALLOW MARVELS

Mallow Marvels—In brilliancy of color and profusion of bloom they surpass all other summer blooming perennials. They bloom during the hot, dry weather better than almost any other flower, making bushy plants 4 to 6 feet high in one season. In winter cut off the old stalks to within 4 to 6 inches of the ground

and they will come up again in the spring. We have found that a moist soil of average fertility with good cultivation gives better flowers than very rich soil, which sometimes causes so much top growth. Colors red, pink, and white.

	Each	Per 10
2-year strong plants	\$.30	\$2.50

GERMAN IRISES

German Irises (Fleur-de-les)—German Irises succeed in partial shade, but produce their best in full sun. They are not particular as to soil, will grow almost anywhere, but do best in well drained rich loam or garden soil, succeeding in quite dry locations. The beauty of their form

and texture, shimmering in the sun with their delicacy and wide range of colors, has given them the name "Orchid of the Garden." Colors white, pink, blue and yellow.

	Each	Per 10
Strong bulbs, 2 to 3 eyes.....	\$.25	\$2.00

CARNATIONS

Carnations—This beautiful old hardy variety of perennial Pink is coming back again. They are most fragrant, beautiful in color, continuous bloomers and are greatly admired by all. Ex-

ceedingly showy and fine for cut flowers. Flowers of large size and very double. Mixed or in colors.

	Each	Per 10
Price	\$.20	\$1.00

SHASTA DAISIES

Shasta Daisies—The plants are as strong as a common field daisy, very tall, well branched, fine cut foliage and huge white flowers borne in profusion on long stiff stems. Flowers are

pure white with gold center, petals very long and center soft and velvety. Hardy plant and one of the novelties that has come to stay.

	Each	Per 10
Price	\$.20	\$1.50

LILY OF THE VALLEY

Lily of the Valley—This wonderful Lily will thrive and throw up its beautiful modest, fragrant white bells in any kind of soil. It will make a carpet of refreshing green, daintily pat-

terned by its pervading flower sprays, in the shady and cold spaces otherwise lost to ornamentation around every house.

	Each	Per 10
Price	\$.10	\$1.00

GOLDEN GLOW

Golden Glow (Rudbeckia)—A fine, hardy plant that should find a place in every garden. It will be found excellent for cut flowers. Plant attains a height of four to six feet and will

produce hundreds of large blossoms, very double and of brilliant golden yellow during August and September.

	Each	Per 10
Price	\$.25	\$2.00

SUPERB HARDY PHLOX

Brilliant summer effects may be produced with these easily grown hardy perennials. They are especially desirable for their great variety of color, and many are delightfully fragrant. They are excellent as single specimens or in the mixed border, but the most imposing effects are produced by planting masses of each color. Phlox are admirably adapted for cemetery planting. They commence blooming in early summer, and if early midseason and late varieties are chosen and the flowers cut off as they fade they will bloom quite late. They succeed in almost any position or soil, but give best results in a rich, mellow soil, well prepared.

Plant 18 inches to two feet apart. After three or four years take them up, divide the clumps, remove any dead portions and replant. A winter mulch of old manure is a great benefit.

Bridesmaid—Pure white with large crimson center.

Lavogue—Pure mauve-pink with red eye.

Richard Wallace—Pure white with violet center.

Snowstorm—Beautiful white.

	Each	Per 10
Strong plants	\$.30	\$2.50
Mixed, all colors25	2.00

STRAWBERRIES

Growing this delicious fruit is the most fascinating of all occupations in the nature of garden growing. They thrive on any kind of soil, well drained, and it is surprising the results that are had. Interesting stories are told by persons who have given it a thorough test, and which have come from men and women, as well as boys and girls. Any one living near a town or city can pick up many a dollar from this source, and if you are in the remote country places it is always a pleasure to have these splendid berries for home use. An acre of strawberries will bring more returns than the same quantity of land planted in any other farm or garden fruit or vegetables.

Progressive Everbearing—Is without doubt the best everbearing strawberry plant in cultivation. The leading strawberry growers of the country agree upon this. It is the only one of the everbearing varieties that does well in the South. Though it is not a good shipping variety, but for home use and local market it is superior to any other sort. It is a good plant maker and will yield fruit the first year, that is truly wonderful. Berries of medium size, smooth and good color, a single plant often producing a hundred berries in one sea-

son. We believe it will produce more berries with less care than any other sort. No lover of strawberries should fail to plant at least a few rows of this variety.

	Per 100	Per 500	Per 1000
Price	\$1.50	\$6.00	\$10.00

By All Means plant acclimated varieties that are best adapted for our climate. We list the kinds that do best in the South and East. You know the country is flooded with advertisements that list many kinds of berries that are not adapted to this part of the country.

Excelsior—Earliest berry in cultivation. Medium size, flesh firm, rich and red, rather tart, but is an unequaled shipper. Largely raised in the South for the Northern markets. Plants very productive. Perfect. Extra early.

	Per 12	Per 100	Per 1000
Price, common sorts, strong plants	\$.50	\$1.25	\$6.00

Improved Lady Thompson—This variety has been grown world-wide in great variety of soils, and it seems to succeed quite well. It is early, very large, and quite productive.

	Per 12	Per 100	Per 1000
Price	\$.50	\$1.25	\$6.00

GARDEN ROOTS

Asparagus Roots should be planted in a well-prepared bed, the roots covered about 4 to 5 inches and the soil made very rich by mulching each season.

	Per 10	Per 50
2-year strong roots	\$.75	\$2.00

You should have a row of Rhubarb or Pie Plant in your garden; 10 to 20 plants are enough for any family, and if the roots are well fed and continuously pruned or reset, they

will yield for years. Easy to plant, cultivating consists merely in keeping the weeds down and preserving the mulch until the leaves cover the ground. The soil should be rich and deep and for an early start it should be warm. Prepare the bed or hill for each plant to a depth of two feet if possible, working in much compost or well rotted manure.

	Each	Per 10
Myatt's Linnaeus, 2-year roots	\$.25	\$2.00

RASPBERRIES

Raspberries are one of the most delicious and popular fruits grown, are easily cultivated and require little care. Cut out old and weak roots each year. Plant in good soil in hills about 4 feet apart. With a little care and attention they will produce large crops of berries. In large plantings it is advisable to plant them thickly the same as hedge row.

Cumberland—The largest of all the blackcaps; coal black berries; very firm and quality of the very best; excellent shipper. Bush a strong grower, stocky canes and unusually prolific. Midseason.

	Each	Per 10	Per 100
Price, strong plants	\$.20	\$1.00	\$5.00

St. Regis—Earliest of all, wonderfully prolific; it equals most blackcap varieties; gives a crop of fruit all summer and autumn, fruiting on old canes in generous quantities until late in August, when berries begin to ripen on young canes. Berries bright crimson, of large size and surpassing quality; canes stocky, strong growth with abundance of dark green, leathery leaves. It succeeds upon all soils, whether light and sandy or cold, heavy clay, and canes are absolutely hardy.

	Each	Per 10	Per 100
Price, strong plants	\$.15	\$1.00	\$6.00
